

Draining the Spa

The drain is located on a hose inside the cabinet underneath the control panel.

To access the drain remove the 8 screws holding the front panel in place, and remove panel.

Locate the drain, cut it free from the zip tie. Remove the cap and attach your garden hose placing the other other end of the hose where you want it to drain. Open the drain as shown below.

When finished draining, reverse the process and refill your spa as shown previously.
