## TRUE TO LIFE COLOR

HENNA COLOR OPTIONS

LIGHT BROWN

MEDIUM BROWN

DARK BROWN

DEEP DARK BROWN

BLACK

# step-by-step guide

## prepare

---

1. Pour the desired amount of henna powder into the mixing bowl
2. Gradually add water using the syringe & stir until a consistency similar to yogurt is achieved
3. Wait approximately 10 minutes for the henna mixture to properly cure

## clean

---

4. Apply pre-cleanser or make-up remover to a cotton pad
5. Using the cotton pad, gently clean the area of application. This is important in order to remove natural oils from the hair so that the henna can properly bond for long-lasting results
6. Using a separate cotton pad, pat the area of application dry

## apply

---

7. Stir the henna mixture well before use. Ensure the consistency is still at an ideal level
8. Using the applicator brush, coat the hair evenly with the henna mixture

## wait

---

9. Wait a minimum of 10-15 minutes after coating the hair with the henna mixture. This time period is important as it allows the henna to properly dye the hair for long-lasting results

## remove

---

10. Apply warm water to a cotton pad & gently wipe away the henna mixture from the area of application
11. Using a separate cotton pad, pat the area of application dry

## aftercare

---

12. Apply the provided nourishing oil to keep the hair healthy and extend the life of the colour

# patch test instructions

- Always perform a patch test prior to the use of this product.
- To properly perform a patch test, cleanse a small area on the inside of the forearm using either soap and water or alcohol.
- Prepare the product for application, apply a small amount to the clean site and allow it to dry.
- After 24 hours, wash the area gently with soap and water.
- If no irritation or inflammation is present after 48 hours, it may be assumed that no hypersensitivity to the product exists.
- Please note that no reaction to a patch test is still not a guarantee that no reaction will occur due to the use of this product and that a patch test should be performed prior to every application.
- Caution - this product contains ingredients which may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made.

# safety instructions

- Always complete a patch test 48 hours before use, following the instructions provided in this pamphlet. This product is for professional use only.
- Not suitable for pregnant women or persons below the age of 18.
- Keep out of reach of children.
- Hair colourants can cause serious allergic reactions.
- Please carefully read and follow the provided instructions.
- Product contains PPD.
- If this product comes into contact with eyes, rinse immediately with water and continue to flush until all product has been washed out.
- Do not use this product on sensitive or irritated skin.
- Do not use this product if client has previously experienced allergic reactions to any type of hair dye, colour or temporary tattoo.
- If any type of skin rash, stinging, burning, swelling, dizziness, shortness of breath, or any negative reaction to the product occurs, stop use immediately and flush with water until all product has been removed and seek medical attention as needed. Symptoms such as these may be an indication of a sensitivity to the product or an allergic reaction.
- Following application of this product, avoid contact with direct sunlight, tanning lights etc. as this may cause allergic reactions.
- Repetitious or excessive use of this product may lead to developing sensitive skin and/or lead to reactions occurring from further use of this product.
- In the event of a skin rash, itching, swelling, or any other reaction resulting during or after use of this product, seek medical help.
