

LED Linear High Bay Light Installation Guide

To avoid the risk of fire, explosion, or electric shock, this product should be installed, inspected, and maintained by a qualified electrician only, in accordance with all applicable electrical codes.

A. Suspending

1. Pick the desired position and drill hole.

3. Hang the fixture and secure the fixture with steel cable.

2. Screw the steel cable onto the ceiling.

Brown = Live
 Blue = Neutral
 Yellow/Green = Earth Wire

4. Wire the light unit to a mains voltage supply and adjust the light to the desired position. Turn on the power to the unit to ensure the light is working properly.

B. Ceiling Mounted

1. Pick the desired position and drill hole.

3. Wire the light unit to a mains voltage supply and install the lamp into the bracket.

2. Screw the clip on the ceiling.

4. Adjust the position for desired angles.
