Product dimension

Other optional plugs

Installation

1.Use the power adapter with DC12/24V of output voltage only.

2.Install the controller correctly, use 3M tape to fix it.

3.Please unfold the LED strip to avoid overheating issues. Please connect the cables of LED strip with the right position on the controller. Test the APP to check if it can control the LED strip correctly. If everything goes well, go to next step.
4.Check and ensure the power supply, controller and LED strip are connected correctly.

1:IR receiver.

- 2: DC12/24V input connection port.
- 3:Output connection port to LED strip.
- 4.Function button:Turn ON

Turn OFF(two short click)

Modes Change

Long press the button for over 5 seconds to reset or network pairing.

Download APP

1: Search the APP- "SMART LIFE" from Apple store or Google Play.

2: Scan the QR code from the label or user manual.

Android supports at least 5.0 system, iOS supports at least 10.0 system (App versions below 3.20 are iOS \geq 9.0. Only suitable for mobile phones, not for tablets and other devices), Bluetooth devices \geq V5.0.

Log in/Register an account

Open the APP - "Smart Life", sign up for a new account or log in with an existing account.

APP connection

1. Preparation: Power on the LED strip and open the APP, please make

sure your mobile and the smart kits are connected to the same WIFI. 2.Connect the controller:

Option 1: After powering on the strip, turn on and off 3 times(or long press the switch button for over 5 seconds), the strip will go into a status of quick flashing. Find the "+"(in the corresponding room of the APP) to add devices. If your mobile bluetooth is already turned on before connecting the LED strip, the APP will connect to the LED strip automatically. If your bluetooth is off before connecting the LED strip, the APP will pop up an interface with tips to ask you to turn on bluetooth. Choose "Allow", then bluetooth function of your mobile will be turned on. The APP will pop up tips with info of the LED strips, then choose "Go to add". The APP will then go to an interface of bluetooth devices, choose the "+" and go into the next interface (Enter Wi-Fi password). Input the password of the WIFI and choose "Confirm", this will be followed by the status "Connecting......", you will need to wait for your mobile to pair with the controller at this step. Choose "Done" when it shows "Added successfully", then go into operation modes. (If option 1 is not suitable with your devices, please refer to option 2)

Option 2: After powering on the strip, turn on and off 3 times(or long press the switch button for over 5 seconds), the strip will go into a status of quick flashing. Find the "+"(in the corresponding room of the APP) into interface of "Add manually". Then choose "lighting" to choose the correct smart devices and go into the interface of "Select 2.4 GHz Wi-Fi Network and enter password". Enter the Wi-Fi password, then choose "Next" and wait until the pairing successful (make sure your mobile and the smart devices are in the same Wi-Fi networks). Then go into the interface of "Scanning devices", after scanning success, choose "Next", it will pop up interface "add successfully" and choose "Done" to go into the operation modes.
