## AC100-277V Open wire connect guide

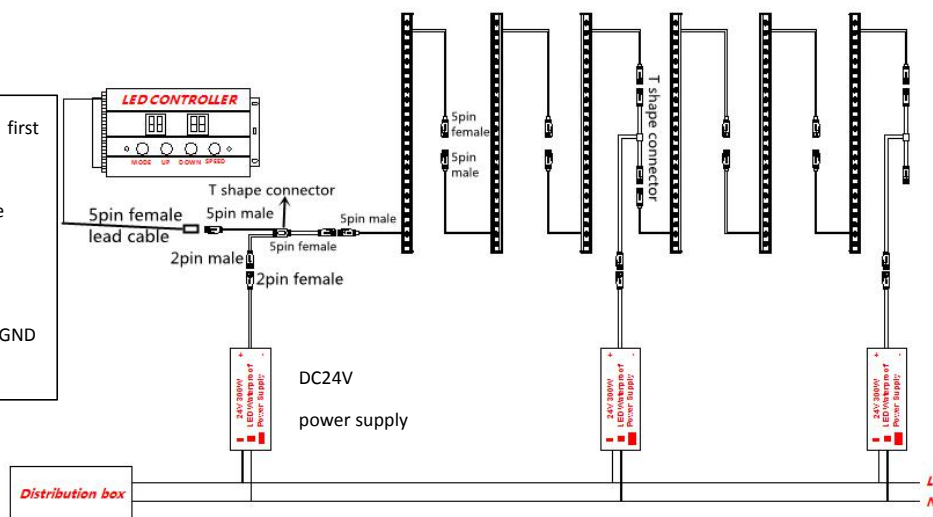

## DC24V uni-color with male and female connector wiring guide

**【 Attention 】** For maximum current the wire can withstand, it can be series connection 36pcs maximum in theory. But there is no such no big power supply in actual application. 60w power supply can take 1pcs 36w fixture.100w power supply can take 2pcs 36w fixtures.200w power supply can take 4pcs 36w fixtures.300w power supply can take 6pcs 36w fixtures.

## DC24V RGB/RGBW DMX fixture wiring diagram connection guide

**【 Attention 】** For the first DMX fixture, only need to connect the green wire with A Blue wire with B Yellow+Green wire with GND to the DMX controller

## DMX fixture note

This DMX fixtures use UCS512DH chips, please use suitable DMX address setting machine which can support UCS512DH chips to write address. Please follow the above wiring diagram to connect DMX fixtures, so that their PI/PO works well.

Connect adjoining fixtures together by connecting the male and female cord ends to each other, then turning clockwise until the connection is secured. To increase the distance between fixtures

Ensure the last fixture in the series has a termination end cap attached to the tail wire (female end).
