Typical base as below:

## Knob function

- Push: Turn on or off light.

After furn on light:

- Rotate: Rotate knob to adjust brightness, 2.5 turns, 50 levels.
- Long push( $1-6$ s): Continuous 256 levels brightness adjustment.
- Connect with 0/1-10V dimmable driver (no use AC OUT)

- Connect with 0/1-10V dimmable driver (use AC OUT)

Note: 1. We recommend the number of LED drivers connected to $0 / 1-10 \mathrm{~V}$ dimmer does not exceed 100 pieces, The maximum length of the wires from dimmer to LED driver should be no more than 50 meters.
2. The MAX. surge current of the AC OUT is 200A. When connecting multiple capacitive (LED power supplies) or inductive loads, the sum of the surge currents can not exceed its maximum value. Otherwise, long-term use may cause product damage.

## $0-10 \mathrm{~V}$ or $1-10 \mathrm{~V}$ dimming setting

Select 0-10V dimmer or 1-10V dimmer according to dimmable LED driver.

## Match Remote Control (two match ways)

The 0/1-10V rotary panel dimmer can also match with the RF dimming remote (optional).
End user can choose the suitable match/delete ways. Two options are offered for selection:

## Use Knob

Match:
Turn on light, turn off, immediately push the knob for 5s, then press on/off key (single zone remote) or zone key (multiple zone remote) of the RF remote within 5 s .
The LED indicator fast flash 3 times means match is successful.

## Delete

Turn on light, turn off, immediately push the knob for 10s, The LED indicator fast flash 6 times means all matched remotes were deleted.

## Use Power Restart

Match:
Switch off the power, then switch on power, repeat again, Immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 3 times on the remote. The light blinks 3 times means match is successful.

## Delete:

Switch off the power, then switch on power, repeat again, Immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 5 times on the remote. The light blinks 5 times means all matched remotes were deleted.
