AmerCareRoyal™ Once Again Achieves Highest GDP Ratings for Food Safety Compliance.

AmerCareRoyal's business within the food service industry gives us good reason to welcome our annual review from SAI Global Assurance Services: a third-party auditor of the food safe product requirements prescribed by the FDA, the Food Safety Modernization Act, Food, Drug and Cosmetic Act, Food Code and the Canadian Food Inspection Act, amongst others.

For the second year in row, SAI Global Assurance's 2018 audit of AmerCareRoyal's warehouse facilities for Good Distribution Practices (GDP) had the following result:

All AmerCareRoyal locations once again achieving a score of Superior —the highest rating possible in the GDP audit assessment of the following:

- **Food safety compliance**
- **Pre-requisite programs in place**
- **Receiving, storage, shipping process**
- **Grounds, facility, and equipment conditions**
- **Pest prevention and control**
- **Hygiene practices within the facility**
- **Food defense and preventive controls**

SAI Global also evaluated AmerCareRoyal's HACCP/Food Safety Plan, Sanitation, GMP, and Quality Management system compliance via a random selection of documentation and staff interviews. Once again, AmerCareRoyal's process, procedures and planning proved to be exemplary.

As much as our continued success with GDP auditing is admirable, I am even further impressed with our AmerCareRoyal team and their dedication, work ethic and professionalism. I look forward to our continued compliance excellence and draw inspiration from our hard-working team every day.

Best Regards,

Scott Milberg
President
