

DOG WALKERS

In this delightful painting about dog lovers and their owners, often referred to as “man’s best friend,” dogs are a part of our lives. You’ll find them just about everywhere—parks, cities, farms, and small purses. We love dogs because of their unconditional love for us, their ability to reassure us in troubled times, and because they could, at any moment, choose to bite our knee caps off—but they don’t. No, instead, they play with us, protect us, and lower our stress levels. Dog Walkers features many different dogs, and their walkers or owners, strolling through New York’s Central Park. If you’re a dog lover this one’s for you!
