## RING SIZER GUIDE

If you are unsure of your ring size, this guide will help you determine which size fits best. Here's how it works:

1 Use an existing ring that fits you perfectly, preferably one that has a similar width and style to the right that you are looking at. It should be a firm fit that is not too hard to take off.

2 Print this document out to $100 \%$ (ensure that the page scaling is set to 'none' on the printing dialogue box. You can check the scaling by measuring the line below as it should be exactly 5 cm .

3 Place the ring over the circles displayed on the page and match the inside edge of the ring to the circle nearest in size. The letter that fits best is your size.

NB: For the best result it is important to pick a ring that fits you when your hand is warm.

We have also included an international size chart allowing you to convert from Australian, USA, European, Swiss or Asian ring sizes.

Please remember at Jan Logan we offer a guarantee on our ring sizes so if the size is incorrect, we will resize if free within 14 days.
