

SIDE BY SIDE - COMPARRISON - TABLE

When compared to the Bullet Mole®, There really is no equal comparrison with other tools.

You can see for your self in this table, that the Bullet Mole far more effective, easy to use, and costs less than the other tools. The main advantages are that :

It will get the job done, FIRST TIME - EVERY TIME !!

It will ALSO install the pipe or conduit !!

You will NEVER loose a tool !!

TIME TO INSTALL A PIPE UNDER A 16 FT. DRIVEWAY	20-30 MINUTES TOPS INCL. ROCKS	A PERSON USING ONE OF THESE TOOLS WOULD STILL BE UNLOADING THE EQUIPMENT & CONNECTING HOSES AND CORDS TO WATER AND POWER SOURCES AND WE WOULD BE DONE and GONE!			

The competitors methods require an array of additional support equipment such as compressors, high torque drills, generators, trucks and trailers. In addition they also require that bulky accessories be used with them such as hoses, extension cords, wrenches Etc...

The methods that incorporate erosion techniques will undermine the substrate of existing pavement which creates settling problems in the future as well as additional work, downtime and frustration by having to wait for the soil to drain & cleaning up the muddy mess.

IN SPITE OF THE ABOVE MENTIONED, IF ROCKS OR BURRIED DEBRIS ARE ENCOUNTERED THE WORK STOPS!!

With The Bullet Mole® These hastles are all avoided. And the job completed no matter what !!
