MPM Antiseptic

Wound & Skin Cleanser

MRSA (Methicillin Resistant Staphylococcus Aureus) • VRE (Vancomycin Resistant Enterococcus)

Used to:

- Clean superficial wounds
- For washing small superficial wounds
- Aids in removal of foreign material such as dirt and debris
- First-aid

Benefits:

- *Nonirritating*
- *Does not delay wound healing*

Directions:

- *Spray on infected area up to three times daily.*
- *May be covered with sterile bandage.*
- *If bandaged, let dry first so bandage will not adhere.*

Contains Lidocaine HCl 2%

MPM Regenecare® Wound Care Gel

**Amorphous hydrogel dressings proven to reduce pain intensity without side effects¹
Proven to reduce both pain and itching in cross-over study²**

Prescription Medical Device

Indications*:

- Pressure ulcers
- Venous stasis ulcers
- First and second degree burns
- Superficial wounds and scrapes

Why they work:

- Medium molecular weight polysaccharides in Aloe Vera, moisturizes the wound environment.
- Marine collagen acts as natural barrier.
- Regenecare contains Sodium Alginate to help absorb drainage

¹ A crossover clinical study of sixty patients with painful deep wounds showed use of a hydrogel containing 2% Lidocaine-HCl and collagen as a contact layer was significant in alleviating dressing-related pain.
– Brad Pontani, M.D., FAAFP, CWS

The study showed:

- Regenecare reduced pain of dressing change by a highly significant number as compared with baseline (dressing change with no anesthetic applied); (N=60; p= .000000156).
- Regenecare appeared to assist or at least did not hinder wound healing with aggressive clinical treatments; 91% of evaluable wounds healed with weekly application of Regenecare as contact layer.
- Regenecare with 2% Lidocaine HCl was statistically more effective in reducing pain of dressing change as compared to Lidocaine HCl 2% jelly, USP (N=10; p=0.000137).
- Regenecare contains active ingredients which improve lidocaine delivery and availability to the wound better than 2% Lidocaine jelly, containing only aqueous excipients and waxes.
- Because Regenecare contains marine collagen, aloe vera and glycerin as active moisturizers, it provides a moist wound bed environment, shown to support wound healing.

Directions:

- Cleanse the irritated area to remove extraneous material.
- Apply to dry, painful skin or tissue three times a day or as needed to assist in pain relief and provide a moist environment for healing.

** Under the supervision of a healthcare professional, Regenecare may be used as indicated.*

² Evaluation of Regenecare® Topical Gel in the treatment of skin rash associated with Cetuximab (Erbix®), Tarceva® and other EGFR inhibitors-treated cancer patients

MPM Regenecare[®]HA Wound Care Gel

Contains
Lidocaine HCl 2%

Topical Anesthetic Hydrogel – Non-Prescription OTC Drug – Contains Sodium Hyaluronate

*Now in a
convenient spray!*

*Eliminates need to
touch painful area*

4 oz spray

4 ml

3 oz

Regenecare HA Wound Gels have been shown to be effective in the management of:

- Minor Burns
- Sunburn
- Minor Cuts
- Scrapes
- Insect Bites
- Minor Skin Irritations

Why they work:

2% Lidocaine HCl reduces pain, inflammation, breaks "itch and scratch" cycle

Directions for Gel or Spray:

Adults and children 2 years of age and older: Apply to affected area not more than 3 to 4 times daily. Children under 2 years of age: Consult a physician prior to use.

** Under the supervision of a healthcare professional, Regenecare HA may be used as indicated.*

	Product #	Size	Pkg.
MPM RegenecareHA	MP00107	3 oz. Tube	12/Cs.

MPM RegenecareHA Spray	MP00117	4 oz. Btl.	12/Cs.

MPM Repel™

Wound Dressing (Composite)

Why it works:

- Center layer absorbs exudate, reducing number of dressing changes
- Top layer allows gaseous exchange
- Absorptive qualities virtually eliminate maceration
- Can be used on infected wounds
- Dressing is non-adherent to tissue, reducing trauma during dressing changes
- Protects wound from urine and feces

WATERPROOF

- Can be left on while showering
- Can be wiped off when soiled

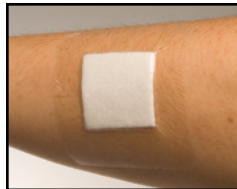

** Under the supervision of a healthcare professional, Repel™ may be used as indicated.*

Directions:

Cleanse wound with MPM Wound and Skin Cleanser.

Partially peel the dressing backing. Apply the exposed pad to the wound. Complete removal of the backing and smooth dressing into place. Dressing can be left in place while showering. Cleanse and re-apply as directed.

	Product #	Size	Pkg.

MPM WoundGard®

Bordered Gauze Dressings

Indications*:

Minor cuts, scrapes, burns and abrasions.

Why it works:

- Maintains a moist environment
- Protects the wound from contamination, blood or drainage strike through
- Absorbs drainage
- Absorbent pad is non-adherent
- Allows the wound to breathe
- Eliminates the need for gauze, tape and scissors

Directions:

- 1) Cleanse the wound.
- 2) Remove backing from dressing and apply dressing to wound.

** Under the supervision of a healthcare professional, WoundGard® may be used as indicated.*

	Product #	Size	Pkg.
MPM WoundGard (Sterile)	MP00091c	2 x 2 Overall 1 x 1 Pad	30/Bag 4 Bags/Cs.

Great for
Skin Tears

Inexpensive. Available as
sterile and non-sterile.

NOTraum

SILICONE

Foam Dressing Bordered

Easy On, Easy Off Benefits:

- **No trauma** for the wound and supporting skin upon removal
- Adheres easily and securely to dry, intact surround skin
- Does not adhere to moist wounds, maintains a moist wound environment
- Waterproof top layer
- Specialty foam quickly absorbs large amounts of fluid
- Minimizes the risk of maceration
- Decreases need for dressing changes and risk of post-op complications.

Indications*:

- Moderate to highly exuding wounds such as pressure, leg & foot ulcers.
- Partial and full thickness wounds
- Superficial wounds
- 2nd degree burns
- Skin tears, road rash & minor injuries

Directions:

Cleanse the wound, remove release liner from dressing, place dressing on wound and secure by gently pressing on silicone border.

** Under the supervision of a healthcare professional, NOTraum Dressing may be used as indicated.*

	Product #	Size	Pkg.

MPM
MEDICAL, INC.

MPM SilverMed®

Antimicrobial Silver

*SilverMed Antimicrobial Hydrogel
Does not contain sulfa*

SilverMed Antimicrobial has been shown to be effective against a broad spectrum of pathogenic bacteria and fungi

Indications*:

SilverMed™ Antimicrobial Hydrogel is indicated for the management of minor burns, superficial cuts, lacerations, abrasions and minor irritation of the skin. Under the supervision of a healthcare professional, it is indicated for partial and full thickness wounds including pressure ulcers, venous stasis ulcers, diabetic ulcers, first and second degree burns, abrasions, lacerations, skin tears, grafted wounds, donor sites and surgical wounds.

Benefits:

- Provides full antimicrobial contact with entire wound bed
- Sustained & effective silver ion release for 3+ days
- Remains clear while in use – no discoloration or staining of tissue
- Non-cytotoxic
- Ideal viscosity – very easy to apply & remove

Why it works:

- Regulates hydration to keep a favorable moisture level
- Extended protection
- Will not stain or irritate the tissue

Directions

- Cleanse wound of dirt, debris, and necrotic tissue.
- Spread Silver Hydrogel throughout the wound to approximately ¼” thickness.
- May cover with dressing, preferably waterproof.
- Change in accordance with your protocol.

** Under the supervision of a healthcare professional, SilverMed® may be used as indicated.*

Drastic Improvement Achieved on edematous, unhealthy granulation tissue

BEFORE **AFTER**

Patient treated unsuccessfully for 1 year prior to use of SilverMed®

- This is a picture of an abdominal surgical wound that was infected, and dehisced. It has a critically colonized wound with a high bioburden, increased odor, and drainage causing unhealthy edematous granulation tissue.
- SilverMed was used once a day for 7 days and covered with MPM Medical Inc. Repel Composite Dressing.
- After 1 week using SilverMed once a day, healthy granulation tissue emerged and the wound almost completely re-epithelialized.

	Product #	Size	Pkg.
MPM SilverMed Hydrogel	ABSM1404	.5 oz. Tube	12/Cs.
MPM SilverMed Hydrogel	ABSM1406	1.5 oz. Tube	12/Cs.
MPM SilverMed Hydrogel	ABSM1410	3 oz. Tube	12/Cs.

MPM Multi-Layered Composite

Bordered & Non-Bordered Dressing

Indications*:

- Heavily-draining wounds
- Deep, partially-thick or fully-thick draining wounds
- Ulcers, stages II, III, IV
- Leg ulcers

Why it works:

- Dressing is non-adherent to tissue
- Center layer absorbs exudate, reducing number of changes
- Top layer allows gaseous exchange while protecting the wound from contaminants
- Maintains moist wound environment

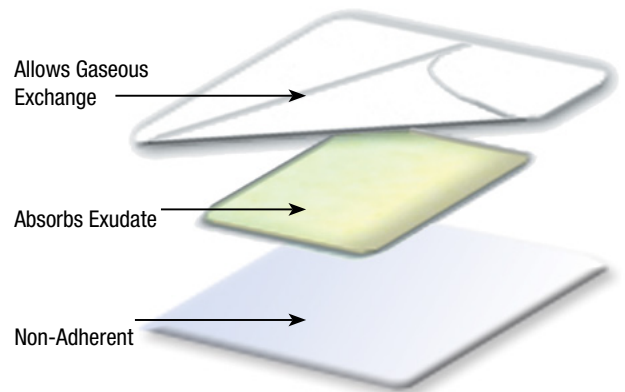

Directions:

- 1) Cleanse the wound.
- 2) Peel back and partially release the dressing backing to expose the pad.
- 3) Apply pad over wound and completely remove backing. Smooth dressing into place.

** Under the supervision of a healthcare professional, Multi-Layered Composite may be used as indicated.*

MPM Spot Dressing

Microlayered, Sterile

MPM Microlayered Spot Dressing comprises a polyurethane membrane covered by a continuous thin film backing with excellent moisture vapor transmission. It is a barrier to liquids and other outside contaminants.

Indications*:

Management of pressure ulcers I-IV, leg ulcers, skin tears, cuts, burns, and abrasions.

Directions:

- 1) Cleanse the wound, removing dirt, debris and necrotic tissue.
- 2) Peel back dressing backing to expose pad and apply over wound.
- 3) Completely remove backing and smooth dressing into place.
- 4) Change dressing according to facility protocol.

** Under the supervision of a healthcare professional, Spot Dressing may be used as indicated.*

MPM Foam Dressing Bordered & Non-Bordered

Uses:

Hydrophilic Foam dressings are appropriate for use as either a primary or secondary dressing.

** Under the supervision of a healthcare professional, Foam Dressing may be used as indicated.*

Circular Tube Site Dressing
MP00501

MPM Isolate Foam Dressings

MPM Isolate Hydrophilic Foam Drsgs.	MP00552	3 x 3 Overall Non-Bordered	30/Bag, 4/Cs.
MPM Isolate Hydrophilic Foam Drsgs.	MP00553	4 x 5 Overall Non-Bordered	30/Bag, 4/Cs.
MPM Isolate Hydrophilic Foam Drsgs.	MP00554	6 x 6 Overall Non-Bordered	30/Bag, 4/Cs.
MPM Isolate Hydrophilic Foam Drsgs.	MP00555	7 x 8 Overall Non-Bordered	30/Bag, 4/Cs.

Why it works:

- Reduces pressure on the wound
- Specialty foam quickly absorbs large amounts of fluid
- Waterproof top layer

Directions:

- Cleanse wound, remove release liner from dressing, place dressing on wound, secure by gently pressing on tape border.
- Secure non-bordered with secondary dressing. Secure non-bordered with secondary dressing.

MPM CoolMagic™ Hydrogel Sheet Dressing

**Instantly cooling, pain relieving
hydrogel sheet dressing**

Indications*:

- Skin irritations
- Minor burns
- Minor cuts, scrapes and abrasions

Why it works:

- Semi-occlusive – allows flow of oxygen
- Helps to prevent bacteria and foreign matter from entering wound
- Hydrophilic and absorptive – absorbs three times its weight

** Under the supervision of a healthcare professional, CoolMagic™ may be used as indicated.*

(Non-Prescription)

	Product #	Size	Pkg.
MPM CoolMagic Gel Sheets	MP00206	3.75 x 3.75	10/Bx., 3 Bxs./Cs.
MPM CoolMagic Gel Sheets	MP00208	6 x 8	10/Bx., 3 Bxs./Cs.

MPM CoolMagic Gel Sheets	MP00219	1¾" Fenestrated	30/Bag, 4 Bags/Cs.

Directions:

- Apply over wound for a cool, soothing effect.
- Change every 24 to 36 hours or as directed.
- Hold in place with tape or stretch gauze.
- Can be applied over hydrogels including those containing silver or lidocaine, such as Regenercare® HA.

MPM Excel Hydrocolloid

Transparent Wound Dressing

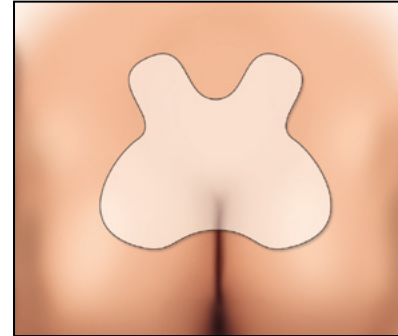

Transparent, will not roll up and you can see the wound!

Effective in the management of:

- Superficial wounds such as cuts, lacerations or abrasions and minor burns.
- Can be used without a prescription under the supervision of a health care professional for: Partial or full thickness dermal ulcers, leg ulcers, second-degree burns and donor sites.

Why it works:

- Absorptive
- Wicks away drainage
- Protective
- Cushions wound bed from pressure and trauma

Directions:

- 1) Cleanse the wound.
- 2) Select dressing that overlaps wound by 1".
- 3) Apply dressing over wound and press down.

** Under the supervision of a healthcare professional, Excel Hydrocolloid may be used as indicated.*

	Product #	Size	Pkg.
MPM Excel Hydrocolloid	MP00600	2 x 2	5 Bag, 10 Bags/Cs.

MPM Excel Hydrocolloid Designed for Sacrum	MP00606	3.6 x 4	5 Bag, 10 Bags/Cs.
MPM Excel Hydrocolloid Designed for Sacrum	MP00608	6 x 6½	5 Bag, 10 Bags/Cs.

MPM ExcelGinate® Dressings

(Calcium Alginate)

Indications*:

Minor cuts, scrapes and abrasions

Why it works:

- Tightly woven to maintain its integrity upon removal
- Recommended for moderately- to heavily-exuding wounds
- Highly absorptive – absorbs four times its weight

Directions:

- 1) Cleanse the wound.
- 2) Apply ExcelGinate to the wound bed and cover with a non-occlusive secondary dressing.
- 3) Change dressing daily.

Will not come apart

** Under the supervision of a healthcare professional, ExcelGinate® Dressings may be used as indicated.*

MPM Hydrogel Saturated Gauze Dressings	MP00014	10 x 6 Gauze 12 Ply	100 Pouches/ Case

Indications*:

- Pressure ulcers, stages I-IV
- 1st and 2nd degree burns
- Stasis ulcers

Why it works:

- Reduces painful dressing removal
- Hydrogel containing Aloe vera and glycerin which provides moisture
- Non-injurious to healthy tissue
- Designed for wound packing

Directions:

- 1) Pack wound with appropriate size GelPad and cover with secondary wound cover.
- 2) Change dressing daily.

** Under the supervision of a healthcare professional, GelPad may be used as indicated.*

MPM Excel-Gel™

Hydrogel Dressing

Indications*:

- Pressure ulcers, Stages I - IV
- 1st and 2nd degree burns
- Stasis ulcers

Why it works:

- Non-toxic
- Non-injurious to healthy tissue
- Aloe vera and glycerin moisturize the wound
- Allows visualization of the wound
- Maintains moist wound environment

Directions:

Apply Excel-Gel to the wound bed approximately 1/4" thick and cover with secondary cover.

** Under the supervision of a healthcare professional, Excel-Gel™ may be used as indicated.*

MPM NormlShield® Cream

An inexpensive choice to effective skin care

NormlShield Cream has been shown:

- Helps prevent and temporarily protect chafed, chapped or cracked skin.

Additional Benefits:

- Offers soothing relief from incontinence related skin problems.

Why it works:

- Aloe Vera moisturizes to help prevent callous build up and cracking of the skin
- Dimethicone seals in moisture and helps to protect skin from outside contaminants

Directions:

Adults and children 2 years of age or older: Cleanse affected area. Allow to dry. Apply NormlShield(R) liberally. Apply as needed.

	Product #	Size	Pkg.
MPM NormlShield Cream	MP00022	4 oz. Tube	12/Cs.

MPM Anti-Fungal™ Cream

Anti-Fungal Cream has been shown to support the effective treatment of:

- Athlete's foot
- Ringworm
- Jock itch

Provides additional benefits:

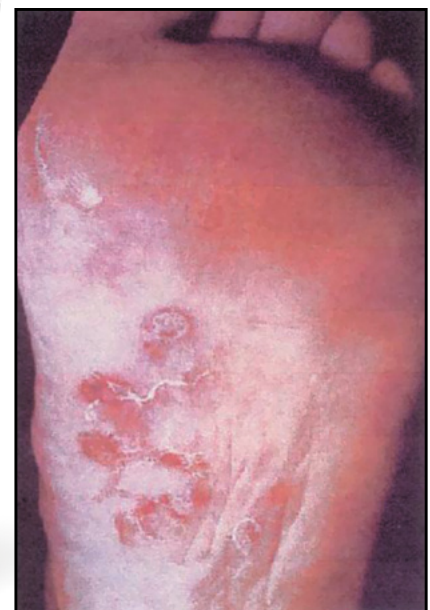

Relief from the discomfort associated with itching, burning & scaling.

Why it works:

Active ingredient - 1% Clotrimazole

Directions:

Clean the affected area and dry thoroughly. Apply a thin layer of the product over affected area twice daily (morning and night) or as directed by a doctor. Supervise children in the use of this product. For athlete's foot: Pay special attention to spaces between the toes; wear well-fitting, ventilated shoes, and change shoes and socks at least once daily. For athlete's foot and ringworm, use daily for 4 weeks; for jock itch, use daily for 2 weeks. If condition persists longer, consult a doctor. This product is not effective on the scalp or nails.

Cures athlete's foot

Fluid Management for Exuding Wounds

Super Absorbent Dressings

MPM DryMax Extra *Super Absorbant Dressing*

Wet wounds have always been a real problem for patients and nurses. Traditional dressings and foam dressings may cause maceration and leakage when used on wet wounds.

MPM DryMax Extra is a thin, sterile, superabsorbent single-use dressing, indicated for use on exuding wounds such as different chronic wounds, legs ulcers, pressure ulcers and diabetic foot ulcers.

MPM DryMax Extra absorbs wound fluid and retains it in the superabsorbent core. The vertical absorption and retention capacity prevents maceration on the wound edges. Bacteria from the wound exudate are absorbed into the core of the product.

MPM DryMax Extra can be used under compression and due to its absorption and retention capacity, it reduces the number of dressing changes compared to traditional products. This reduces treatment costs and improves the quality of the life for the patients.

Clinicals, Guides, Videos and More

To aid you in your treatment of advanced wounds and oncology issues, MPM Medical, Inc. provides you with a number of clinical studies, guides, videos collateral materials and more.

Using the easy-to-scroll menu to the right you will find PDF's on how minimize the pain of chemo and radiaion side effects, a wound care product guide, and a wound care management guide.

The clinicals include subjects as diverse as infected abdominal wounds, toxicity, skin rashes, using collagen on wounds and alleviating dressing related pain.

Our videos take you into Dr. Brad Fontain's clinic to hear how they use Hydrogels, RegeneCare, RegeneCareHA, and SilverMed.

RegeneCare HA SPRAY
• Topical Anesthetic Hydrogel
• With Lidocaine HCl
• Effective in relieving pain
