

# Ultra-Slim Clear HD Tempered Glass Screen Protector

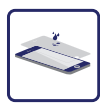

Easy to Install Applicator | 3D Touch Compatible | 9H Hardness

Smudge Resistant

Touch Sensitive

Oleophobic Coating

9H Hardness

Shatterproof Glass

HD Clarity

PrimeShield-i8+ is an ultra-tough high density tempered glass screen protector for iPhone 8+. It is constructed using an innovative scratch resistant tempered glass material which is five times stronger than regular glass and can resist scratches even from knives and keys. The self-absorbed adhesive side of this screen protector is coated with an anti-shatter silicon film that ensures protection to your device even if the glass shatters and also assists in easy installation of the screen protector. PrimeShield-i8+ is made of an optical graded PET film that enhances colour and provides a sharper view. Promate PrimeShield-i8+ is an obvious choice when it comes to optimum screen protection.
