

# Auto Focus Full-HD Pro WebCam

## with Built-In Mic

ProCam-2

Tripod Stand Included

ProCam-2 delivers smooth video calls for clear communication with long-distant colleagues, family and friends. The automatic low light correction and wide angle lens ensures sharper pictures, richer colors, smoother video, and clearer sound in real-world conditions.

### Features

**1080p** This streaming webcam runs at 30 frames per second and 2 million pixels in HD 1080p video which is perfect for High Quality Video Conferences

 Ultra-wide Angle lens reduces dead corners which is great for webinars, online courses and video conferencing

 Clip it on the computer or laptop monitor or place it on the tripod. And connect the USB cable.

 Automatic low light correction technology allows the webcam to capture video and image even in dim light

 The omni-directional noise reduction mic filters out external background noise and make the sound clearer.

 Video automatically adjusts to ensure your image stays sharp and clear.

### Specification

- IC: 3518EV300
