

# High Definition USB Gaming Microphone

Designed for professional streaming and gaming, the streamer microphone is key when you want your voice heard. Equipped with professional grade microphone technology that records true-reality sound with minimal noise and electrical interference, Streamer is your go to microphone during any raid.

## Features

- Flexible gooseneck design allows you to adjust the microphone at any angle for comfortable usage.
- The microphone boasts an in-built high-density filter, which makes sure only high-quality sound is recorded.
- Streamer features a mute button which enables you to mute your sound just by flicking a switch with LED indicators.
- Simply plug in the USB to your device and start using the microphone without the need for additional software or drivers.
- Streamer is compatible with almost every computer-based digital audio workstation software.
- Microphone features a headphone output port for seamless recording and streaming.
