

Roll Bars: Clamp On Style and Quick Release Style

Clamp on Roll Bar

The clamp on roll bar is screwed onto the top bar of the trailer with a hex key (provided). With a little practice, removing the roll bars takes less than 5 minutes

Quick Release Roll Bar

Quick Release roll bars pin onto the roll bar with a detent pin. The horizontal bar of the trailer has a spigot welded onto it to accept the tow bar and the pin. If you expect to take the trailer apart every time you use it, this will save some time.
