

The revolutionary PRO series of hearing protectors enable you to play, produce and listen to music at safer volumes without making you feel isolated from your environment. Custom moulded to your ears, these professional hearing protectors are manufactured from soft, medical grade silicone. They are comfortable, discreet and are available in a wide range of colours and levels of attenuation (damping) to suit a wide range of ambient sound levels.

The PRO-20 acoustic filter has been designed to provide relatively flat attenuation to remove low frequency noise and aid communication, then a progressive damping increase at approximately 4kHz to remove irritating high frequency sounds. Designed specifically for musicians playing louder instruments, the PRO-20 is an ideal choice for drummers. Its vented design helps in reducing occlusion giving a more natural sound so you can concentrate on your performance. PRO-20 provides protection in ambient sound levels of up to 105dB

### Acoustic Specification

Minimum guaranteed damping level (dB)	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz	H	M	L	SNR
PRO 20	13.5	14.5	16.7	16.9	20.9	20.3	24.5	20	18	17	20

Weight	3g Net   83g Gross   Average weight will vary according to ear size	
Build Material	40 Shore Medical Grade Silicone	
Mould Type	Canal Mould	
Standard Colour	Clear	
Included Accessories	Instruction Leaflet, Wax Pick, Comfort Cream, Carry case	
Optional Accessories	Neck cord, Grips	
Package Dimensions	100mm x 55mm x 38mm	
Warranty Period	1 Year against manufacturing and component failure	
Tested to conform to EU Noise at Work Standard EN352-2		
Attenuation Determined by BSI Product Services (0086), Maylands Avenue Hemel Hempstead, Herts, HP2 4SQ
