Stille scissors

Stille is world famous for our unique high quality scissors. Stille scissors are extremely light and well balanced. They cut cleanly, not only when new, but also throughout their long life. This is due to careful attention to every part of the instrument during design and production.

Stille scissors offer maximum cutting force for all kinds of soft tissue with a minimum of effort. They are available as ordinary stainless steel scissors, Super Cut scissors and Ergonomic scissors.

## Super Cut Scissors

### What are Super Cut Scissors?

Stille Super Cut Scissors have an unrivaled cutting performance. In addition to incorporating all the advantages of conventional scissors, they are sharper.

### Why are Stille Super Cut Scissors superior to ordinary scissors?

Because they have specially designed cutting edges – one scissors-ground and one knife-ground blade – the scissors actually cut their way through the tissue.

Super Cut edge

Ordinary edge

### What other advantages do Stille Super Cut Scissors offer?

They cut with extreme precision right down to the points of the blades. The special grind makes them suitable both for right-handed and for left-handed surgeons.

### How can you recognize Stille Super Cut Scissors?

The shafts are black-chromed.

### Are Stille Super Cut Scissors all-purpose scissors?

Yes, in the case of tissue, because they cut coarse tissue as efficiently as fine, and with as great precision. Sutures must be avoided as they may damage the fine edges of the scissors. Special Stille scissors are available for cutting sutures.

### Why should you choose Original Stille Super Cut Scissors?

Quite simply because the original is always better than a copy. Stille introduced the world's first Super Cut Scissors 1982. Swedish precision manufacture and the Stille brand name together guarantee that Stille Super Cut Scissors are of the finest conceivable quality.

### Can you sharpen Super Cut Scissors?

Yes, of course. Just like any other scissors, Super Cut Scissors require sharpening occasionally. When it is time for regrinding, Stille's own instrument service department will ensure that the scissors are taken care of with the utmost precision.

## Stille Ergonomic Scissors

Surgical scissors are normally held in a precision grip, involving the thumb and the third or fourth finger. The grip works best when the hand is close to its basic resting position – a position that is the most comfortable. When using traditional scissors, the hand is not held in this position, but rather in a strained, more closed position.

The way to achieve this resting position is to use scissors with a shank design that is slightly different compared to traditional scissors.

The idea behind this new shape is ergonomics. By using ergonomically designed scissors, time consuming procedures can be performed with less strain on the hand. The effect of this is better comfort that enables the surgeon to avoid fatigue in the hand.

Of course the ergonomic scissors have the rest of the features of Stille Super Cut Scissors.

Scissors should only be used for their intended purpose. Do not cut suture, gauze or wire with normal scissors or Super Cut scissors. To maintain the unique cutting performance, Super Cut scissors must be returned to Stille Service for sharpening. Incorrect handling or use of Stille scissors will invalidate the warranty.

### How to test Stille scissors:

- Feel - smooth motion and soft resistance
- Cut - evenly, all the way to the tip
- Listen - no strange sounds
- Look – no visual damages on the blades

### STILLE EYE SCISSORS

Delicate eye scissors with sharp or blunt tips and large finger rings. These are also called iris scissors and are used for nerves, tendons and vessels. They are intended for facial surgery and any type of delicate surgery. Beveled blades.

- \* 101-8001- Straight Sharp 9.5 cm 3.75"
- 101-8002- Straight Blunt 9.5 cm 3.75"
- 101-8003- Curved Sharp 9.5 cm 3.75"
- 101-8004- Curved Blunt 9.5 cm 3.75"

### STILLE EYE SCISSORS

Eye scissors for delicate work. Large finger rings for a comfortable grip. Beveled blades.

- \* 101-8010- Straight Sharp 10 cm 4"
- 101-8011- Straight Blunt 10 cm 4"
- 101-8015- Curved Sharp 10 cm 4"
- 101-8016- Curved Blunt 10 cm 4"

### STILLE SUPER CUT EYE SCISSORS

Super Cut eye scissors with sharp or blunt tips and extremely sharp edges. Beveled blades.

- \* 101-8010-1 Straight Sharp 10 cm 4"
- 101-8011-1 Straight Blunt 10 cm 4"
- 101-8015-1 Curved Sharp 10 cm 4"
- 101-8016-1 Curved Blunt 10 cm 4"

**STILLE SUPER CUT BLEPHAROPLASTY**

Short delicate Super Cut scissors suitable for blepharoplasty.

- 101-8018-1 Straight 9.5 cm 3.75"
- \* 101-8019-1 Curved 9.5 cm 3.75"

**STILLE ERGO BLEPHAROPLASTY**

Blepharoplasty Super Cut scissors with ergonomically designed shanks for a more relaxed grip.

- \* 101-8019-2 Curved 9.5 cm 3.75"

**RAGNELL SUPER CUT BLEPHAROPLASTY**

Short delicate Super Cut scissors with blunt, flat tips for blepharoplasty.

- \* 101-8030-1 Straight Blunt 9.5 cm 3.75"
- 101-8031-1 Curved Blunt 9.5 cm 3.75"

\* Photo shows this instrument

**RAGNELL ERGO BLEPHAROPLASTY**

Blepharoplasty Super Cut scissors with ergonomically designed shanks for a more relaxed grip.

\* 101-8031-2 Curved 9.5 cm 3.75"

**KAYE**

Scissors with serrated blades for "holding" the tissue, making it easier to cut exactly as far as intended.

\* 101-8020- Curved Serrated blunt 10 cm 4"  
 101-8021- Curved Serrated blunt 12.5 cm 5"  
 101-8022- Curved Serrated sharp 12.5 cm 5"

**PECK**

Serrated scissors for excision of upper lateral cartilage.

\* 101-8024- Straight Sharp, serrated 15 cm 6"

\* Photo shows this instrument

### FOMON

Scissors for rhinoplasty. Double-beveled blades.

\* 101-8025- Curved 12.5 cm 5"

### KAYE

Serrated dissecting scissors.

\* 101-8027- Curved Blunt 18 cm 7"

### JABALEY

Sharp scissors suitable for hand surgery, where very strong scissors are used. Beveled blades.

\* 101-8060- Straight Sharp 12.5 cm 5"  
101-8062- Curved Sharp 12.5 cm 5"

\* Photo shows this instrument

**JABALEY SUPER CUT**

Super Cut scissors for dissection of tough tissue in hand surgery. Beveled blades.

- \* 101-8060-1 Straight Sharp 12.5 cm 5"
- 101-8062-1 Curved Sharp 12.5 cm 5"

**JABALEY STILLE ERGO**

Ergonomic model to avoid fatigue in the hand. Beveled blades.

- \* 101-8060-2 Straight Sharp 12.5 cm 5"
- 101-8062-2 Curved Sharp 12.5 cm 5"

**MAYO-STILLE**

The most used scissors, for all types of surgery. Used for routine dissection and cutting in tissue. Beveled blades.

- 101-8080-15 Straight 15 cm 6"
- 101-8080-17 Straight 17 cm 6.75"
- \* 101-8082-15 Curved 15 cm 6"

**STILLE-MAYO SUPER CUT**

Sturdy Super Cut scissors with rounded blades for dissection of tough tissue.

101-8085-15	Straight	15 cm 6"
101-8085-17	Straight	17 cm 6.75"
101-8085-19	Straight	19 cm 7.5"
101-8087-15	Curved	15 cm 6"
* 101-8087-17	Curved	17 cm 6.75"
101-8087-19	Curved	19 cm 7.5"

**STILLE-MAYO ERGO**

Ergonomic Super Cut model to avoid fatigue in the hand. Rounded blades. For dissection of tough tissue.

101-8087-152	Curved	15 cm 6"
* 101-8087-172	Curved	17 cm 6.75"

**MAYO-NOBLE**

Short and strong dissecting scissors mainly for orthopaedic surgeons. Beveled blades.

101-8090-	Straight	18 cm 7"
* 101-8092-	Curved	18 cm 7"

\* Photo shows this instrument

**BABY MAYO**

Delicate version of the regular Mayo scissors. Mainly for plastic- and hand surgery. Beveled blades.

- 101-8100-15 Straight 15 cm 6"
- \* 101-8102-15 Curved 15 cm 6"

**SIMS**

Mainly used in gynecological and other pelvic surgery. Beveled blades.

- \* 101-8138- Curved 20 cm 8"

**BABY METZENBAUM**

Short, delicate dissecting scissors with rounded blades. Used in delicate surgery requiring small instruments.

- \* 101-8160- Straight Rounded blades 12.5 cm 5"
- 101-8162- Curved Rounded blades 12.5 cm 5"

\* Photo shows this instrument

**BABY METZENBAUM SUPER CUT**

Super Cut dissecting scissors for tough tissue. Used in delicate surgery requiring small instruments.

- \* 101-8161- Straight Rounded blades 12.5 cm 5"
- 101-8163- Curved Rounded blades 12.5 cm 5"

**BABY METZENBAUM ERGO**

Ergonomic model for better control.  
 Rounded blades.

- \* 101-8163-2 Curved 12.5 cm 5"

**METZENBAUM DELICATE**

Very delicate version of the popular Metzenbaum dissecting scissors. Rounded blades.

- \* 101-8172-18 Curved 18 cm 7"
