SAFETY AND INSTALLATION INSTRUCTIONS

WARNING!
Before the appliance is used, it must be properly positioned and installed as described in this manual, so read the manual carefully. To reduce the risk of fire, electrical shock or injury when using the appliance, follow basic precautions, including the following:

1. Stainless steel models exposed to chlorine gas and moisture such as areas with spas or swimming pools, may have some discolorations of the stainless steel. Discoloration from chlorine gas is normal.
2. NEVER USE CHLORIDE TO CLEAN STAINLESS STEEL.

CAUTION!
• Plug into a grounded 3 prong outlet, do not remove prong, do not use an adapter and do not use an extension cord.
• Replace all panels before operating.
• It is recommended that a separate circuit serving only your appliance be provided. Use receptacles that cannot be turned off by a switch or pull chain.
• Never clean appliance parts with flammable fluids. These fumes can create a fire hazard or explosion.
• Do not store or use gasolines or other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
• Do not connect or disconnect the electric plug when your hands are wet.
• Unplug the appliance or disconnect power before cleaning or servicing. Failure to do so can result in electrical shock or death.
• Do not attempt to repair or replace any part or your appliance unless it is specifically recommended in this manual. All other servicing should be referred to a qualified technician.

POWER FAILURE
Most power failures are corrected within a few hours and should not affect temperature of your appliance if you minimize the number of times the drawer is opened. If the power is going to be off for a longer period of time, you need to take the proper steps to protect the contents.

VACATION TIME
Short Vacations: Leave the appliance operating during vacations of less than three weeks.
Long Vacations: If the appliance will not be used for several months, remove all items and turn off the appliance. Clean and dry the interior thoroughly. To prevent odor and mold growth, leave the drawer open slightly, blocking it open if necessary.

MOVING YOUR APPLIANCE
• Remove all items.
• Securely tape down all loose items inside your appliance.
• Turn the adjustable legs up to the base to avoid damage.
• Tape the drawers shut.
• Be sure the appliance stays secure in the upright position during transportation. Also protect the outside of the appliance with a blanket or similar item.

RISK OF CHILD ENTRAPMENT
1. Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous, even if they will “just sit for a few days.”
2. Before discarding your old refrigerator: Take out the drawers.
ENERGY SAVING TIPS

- The appliance should be located in the coolest area of the room or outdoor location, away from heat producing appliances and out of direct sunlight.
- Ensure that the unit is adequately ventilated. Never cover air vents.
- Do not keep the door open any longer than necessary.
- Organized and labeled stored items reduce door openings and extended searches.
- Remove as many items as needed at one time and close the door as soon as possible.

GENERAL SAFETY REQUIREMENTS

- Use two or more people to move and install appliance. Failure to do so can result in back or other injury.
- To ensure proper ventilation for your appliance, the front of the unit must be completely unobstructed.
- Choose a well-ventilated area with temperatures above 50°F (10°C) and below 109.4°F (43°C).
- The appliance should not be located next to ovens, grills or other sources of high heat.
- The appliance must be installed with all electrical, water and drain connections in accordance with state and local codes. A standard electrical supply (115 V AC only, 60HZ), properly grounded in accordance with the National Electrical Code and local codes and ordinances is required.
- Do not kink or pinch the power supply cord of the appliance.

WARNING!

FOLLOW WARNING CALL OUTS BELOW ONLY WHEN APPLICABLE TO YOUR MODEL

- The size of the fuse (or circuit breaker) should be 1.3 amperes.
- It is important that the appliance be leveled in order to work properly. You may need to make several adjustments to level it.
- All installations must be in accordance with local plumbing code requirements.
- Never allow children to operate, play with or crawl inside the appliance.
- Do not use solvent-based cleaning agents or abrasives on the interior. These cleaners may damage or discolor the interior.
- Use this appliance only for its intended purposes as described in this instruction manual.
- Keep fingers out of the “pinch point” areas. Clearances between the drawer and cabinet are necessarily small. Be careful closing drawer when children are in the area.

BEFORE OPERATING

SHIPMENT ARRIVING DAMAGED:

VISIBLE DAMAGE
If your shipment arrives with visible damage to the box/carton, be sure the damage is noted on the bill of freight or express receipt and signed by the person making the delivery. File claim for damages immediately, regardless of the extent of damage.

CONCEALED DAMAGES
If damages are unnoticed until the wine cooler is unpacked, notify the transportation company or carrier immediately and file a concealed damage claim with them. This should be done within (5) days of the delivery date. Be sure to hold on to the box/carton for inspection. We cannot assume responsibility for damage or loss incurred in transit.

IMPORTANT NOTES:

CONSTRUCTION ZONES
Keep all stainless steel products away from construction zones. Construction debris such as (but not limited to) stone dust, stucco, and lime dust could damage or permanently discolor stainless steel products. Keep all caustic chemicals including chlorine and pool cleaning products away from stainless steel at all times.

An audible alarm sounds if the storage temperature is not cold enough. The temperature display flashes at the same time.

The cause of the temperature being too high may be:
• Too much warm ambient air flowed in when rearranging and removing stored items.
• Power failure for some time.
• The appliance is faulty.

The audible alarm is automatically silenced and the temperature display stops flashing when the temperature is sufficiently cold again.

If the door has been left open for more than 60 seconds, the alarm will sounds. Pressing any key once can switch off the audible alarm.

DOOR LOCK
The unit is provided with a lock and key combination. The keys are located inside the plastic bag that contains the Instruction manual. Insert the key into the lock and turn it counterclockwise to unlock the door. To lock the door, do the reverse operation making sure the metal pin is engaged completely. Remove the key and put it in a secure place for safekeeping.

CLEANING YOUR APPLIANCE
• Turn off the power, unplug the appliance, and remove all items, including shelves.
• Wash the inside surfaces with a solution of warm water and baking soda (about 2 tablespoons of baking soda to a quart of water).
• Wash the shelves with a wet cloth.
• Wring excess water off of the sponge or cloth when cleaning the area where the controls are located or any electrical parts.
• Wash the outside cabinet with warm water and mild liquid detergent. Rinse well and wipe dry with a clean soft cloth.
• Use an approved stainless steel cleaner to clean the door and handle. Do not sue steel wool or a steel brush on stainless steel.
• Caution: Failure to unplug the appliance during cleaning could result in electrical shock or other personal injury.

POWER FAILURE
Most Power Failures are corrected within a few hours and should not affect the temperature of your appliance if you minimize the number of times the door is opened. If the power is going to be off for a longer period of time, you need to take the proper steps to protect the contents.

BEFORE USING YOUR APPLIANCE
Remove the exterior and interior packing. Before connecting the appliance to the power source, let it stand upright for approximately 24 hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.

Clean the interior surface with lukewarm water using a soft cloth.
Install the handle on the door if not already attached.
You can solve many common problems easily, saving you the cost of a possible service call. Try the suggestions below to see if you can solve the problem before calling the servicer.

OPERATING YOUR APPLIANCE

CLEANING AND MAINTENANCE (CONTINUED)

• USE OF ABRASIVE PADS SUCH AS SCOTCHBRITE WILL CAUSE THE GRAINING IN THE STAINLESS TO BECOME BLURRED.
• Rust that is allowed to linger can penetrate into the surface of the stainless steel and become impossible to remove.

It is recommended that you install the appliance in a place where the ambient temperature is between 50°F and 109.4°F (10°C-43°C). If the ambient temperature is above or below recommended temperatures, the performance of the unit may be affected. For example, placing your unit in extremely cold or hot conditions may cause interior temperatures to fluctuate. The operating temperature range may not be reached.

CONTROL PANEL

ON/OFF Power
To turn the appliance ON or OFF, press and hold the POWER key for 5 seconds.

UP ▲ and DOWN ▼
Press SET first, then press ▲ or ▼ button to increase (warm) or decrease (cool) the set temperature by 1°C/1°F.
Press SET again, the temperature is selected and shows the actual temperature. If no other further operation in 6 seconds, display will show actual temperature in the cooler

°F/°C SELECTOR
Selects the temperature display setting in Fahrenheit or Celsius degrees. To change the temperature from Fahrenheit to Celsius or from Celsius to Fahrenheit, press ▼ and SET at the same time, then hold for 6 seconds.

SETTING THE TEMPERATURE CONTROL
The temperature you are setting will increase by one degree each time you press the ▲ key and will decrease by one degree each time you press the ▼ key.
The range of temperature control is from 32°F to 50°F.

To view the set temperature at any time, press the SET key. The set temperature will flash in the display window for 6 seconds. After 6 seconds, the temperature inside the unit will reappear in the display window.

(The temperature preset at the factory is 36°F)

INTERIOR LIGHT
This unit is equipped with an interior LED light which will be turned ON when the door is open and the interior fan is stopped at the same time. You can press ▼ to manually turn on or turn off the light.

DEFROSTING
The unit defrosts automatically in normal operating conditions. The evaporator behind the rear wall of the unit defrosts automatically. The condensation collects in the drainage channel behind the rear wall of the unit and flows through the drainage hole into the drip tray by the compressor where it evaporates.
However, frost may accumulate on the evaporator if the unit is repeatedly opened in a high heat or high humidity location. If this frost pattern does not clear within 24 hours, your unit will require manual defrosting.
Press ▲ and hold for 6 seconds, the unit will be defrosted.
To stop defrost, please repeat the same interaction.

NOTE:

INSTALLATION OF YOUR APPLIANCE

Your outdoor wine cooler has been designed for both built-in and free standing applications. When built-in, your wine cooler door does not require additional air space for top, side or rear. The front grille must not be obstructed.

It is recommended that you do not install the appliance near an oven, radiator or other heating source, as heat sources may increase electrical consumption. Do not install in a location where the temperature will fall below 50°F (10°C). For best performance, do not install the appliance behind a cabinet door or block the base grille.
Plug the appliance into an exclusive properly grounded wall outlet.

SITE PREPARATION

1. Position the unit on a flat, level surface capable of supporting the entire weight of the unit. Remember the unit will be significantly heavier once it is fully loaded.
2. Connect the unit to a Ground Fault Interrupter (GFI).
3. The unit must be installed according to your local codes and ordinances.

4. ELECTROCUTION HAZARD!
   - Electrical Grounding Required - This appliance is equipped with a three prong (grounding) polarized plug for your protection against possible shock hazards.
   - NEVER remove the round grounding prong from the plug.
   - NEVER use a two prong grounding adapter.
   - NEVER use an extension cord to connect power to the unit.
   - Where a two-prong wall receptacle is encountered or a longer power cord is required, contact a qualified electrician to have it replaced in accordance with applicable electrical codes.

LOCATION OF PARTS

LEVELING THE UNIT
Position the unit on a flat, level surface capable of supporting the entire weight of the unit when full. The unit contains four (4) adjustable leveling legs. Turn the leg's clockwise to raise and counterclockwise to lower.

INSTALLING HANDLE
To install the handle, follow the instructions below.
1. Remove the gasket on the right side.
2. Take out the screws from bag in cabinet. Put the screws in the holes where the handle is to be installed.
3. Align the handle with screws, tighten the screws using a screwdriver until the handle is both flush and secured tightly against the door side. (DO NOT over-tighten as this may cause damage to the door surface.).

ELECTRICAL CONNECTION
Put the screws on top of the drawer where the handle is to be installed. Align the handle with screws, tighten the screws using the screwdrivers.

WARNING!
Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by a qualified electrician or an authorized service center.
ELECTRICAL CONNECTION CONTINUED

This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with a standard three-prong wall outlet to minimize the possibility of electrical shock.

Do not under any circumstance cut or remove the third (ground) prong from the power cord supplied. For personal safety, this appliance must be properly grounded. Any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized service center.

The appliance requires a standard 115/120 Volt AC-60HZ three-prong grounded electrical outlet. Have the wall outlet and circuit checked by a qualified electrician to make sure they outlet is properly grounded. When a standard 2-prong wall outlet is encountered, it is your responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

To prevent accidental injury, the cord should be secured behind the appliance and not left exposed or dangling.

The appliance should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating label on the appliance. This provides the best performance and also prevents overloading house wiring circuits that could cause a fire hazard from over heating. Never unplug the appliance by pulling on the power cord. Always grip the plug firmly and pull straight out from the receptacle. Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end. When moving the appliance, be careful not to damage the power cord.

EXTENSION CORD

Because of potential safety hazards under certain conditions, it is strongly recommended that you do not use an extension cord with this appliance. However, if you must use an extension cord it is absolutely necessary that it be a UL/CUL-Listed, 3-wire grounding type appliance extension cord having a ground type plug and outlet and that the electrical rating of the cord be 115 volts and at least 1.3 amperes.
WARRANTY:
(3) year warranty on the compressor. (1) year warranty on all electrical

WARRANTY LIMITATIONS & EXCLUSIONS
This warranty shall apply only to the products purchased and located in the continental United States and Canada. The warranty coverage begins on the original date of purchase and proof of date of purchase is required. In order to activate the warranty, we require that you send in the attached warranty registration card. This warranty applies only to the original owner and may not be transferred.

This warranty does not apply to damages resulting from negligence, alteration, misuse, abuse, accident, natural disaster, improper installation or improper operation, unauthorized adjustments or calibrations, dings, dents, scratches, or damages due to harsh cleaning chemicals. This warranty does not apply to commercial use, or to products with altered or removed serial numbers. The Manufacturer shall not be liable for incidental, consequential, special or contingent damages resulting from its breach.

WARRANTY SERVICE & REPLACEMENT PARTS:
Call your authorized selling dealer or call Summerset directly at 800-966-8126

Be prepared to furnish the following information:

Purchaser’s name, model and serial number of the refrigerator, date of purchase and the accurate description of the problem. The Manufacturer will not pay for service calls for correcting an installation problem. Owner shall be responsible for proper installation, providing normal care and maintenance, proving proof of purchase upon request and making the Refrigerator accessible for service.

In the event of any warranty replacement, all removal, replacement, installation and shipping costs are the responsibility of the Refrigerator owner.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusions of or limitations on consequential damages. This warranty gives you specific legal rights and you may have other rights, which vary from state to state.
WE MAKE IT ALL
Summerset Professional Grills strives to meet every outdoor living expression. We offer a wide range of products from grills, refrigeration, sinks, accessories and more. Our goal is to ensure you have everything you need to create your perfect outdoor atmosphere. No matter the style or budget, Summerset will deliver an experience that will help create the ultimate backyard getaway.

GRILLS
Summerset Professional Grills offers a complete line of commercial grade stainless steel Power Burners, Power Burner carts, power burners, and side burners for any style, use, or budget. Whether you’re looking for a simple, clean, entry-level grill, or a heavy-duty grill that supports charcoal, lump coal, and wood chunks, we have it all.

ACCESSORIES
Summerset’s full line of stainless steal outdoor kitchen components makes sure you have everything you need for the perfect outdoor kitchen experience. Double-lined construction provides the extra insulation and resilience needed against the elements, soft closing drawers offer a luxurious feel, and a thicker flange provides a sturdy, seamless fit and elegant style that will work with any countertop and island finish.

SINKS AND BAR PREP
Take your outdoor kitchen to the next level with our sinks and ice chests. The Summerset Beverage Center is complete with an ice compartment, sink, towel holder, speed rail with condiment tray, LED lights, and a built-in bottle opener. When you’re grilling, we want to make sure you have everything you need conveniently on hand.

We are a family owned and operated business that is located in beautiful Huntington Beach, California. We pride ourselves in using only the best materials, and our commitment to quality is reflected in the craftsmanship of the entire Summerset line of barbecue Power Burners, components, and more. With over 20 years of leadership in branding and manufacturing, our core focus is to provide exceptional customer service with an unparalleled warranty.
