# SLOW COOKER SERIES

Achieving traditional barbecue flavor demands a low temperature, lots of moisture, and a long cooking time. Unlike cookers made with a stamped steel shell, the Q3 Grill's thick aluminum casting maintains a consistent cooking temperature all day.

The stainless steel drip pan eliminates flare-ups as drippings fall onto the pan and vaporize to produce flavorful smoke. Excess fat and liquids flow down into the drain channel and out of the grill to the external drip bucket.

# CHARCOAL SERIES

The C3 has a large grill head in cast aluminum, which heats quickly and evenly, and then helps you maintain a consistent cooking temperature. This tall grill head, with its adjustable cooking grids, maximizes the available volume to give you the freedom to tackle any size meal.

Twin air intakes on the front panel and a rotary dual-function top vent adjust from wide open to fully closed – allowing precise control of temperature and smoke. The two front-loading doors let you add charcoal or wood chunks or redistribute hot coals via the upper door without removing a cooking grid. Ash falls into the pan which slides out through the lower door for easy disposal.
