Use bassinet with only child at a time.

**ALWAYS** attach all provided fasteners (strings, straps, clamps etc...) tightly to the bassinet according to the instructions. Check frequently.

Strings can cause strangulation! **DO NOT** place items with a string around a child's neck, such as hood strings or pacifier cords. Do not suspend strings over a bassinet or attach strings to toys.

**DO NOT** leave child unattended in the bassinet.

**ALWAYS** make sure the wheels or stands are in the locked "down" position.

**NEVER** place bassinet near a window where cords from curtains can strangle a child.

Adult assembly is required.

Remove any tools or excess parts including plastic packaging from the bassinet vicinity after its assembly.

Discontinue use of the bassinet before the infant can sit up by themselves.

Padding and cushioning materials, including the mattress are to be sufficiently firm to preclude conforming to the contours of the infants face.

Ensure proper ventilation is maintained in and around the bassinet by limiting bed clothes, extra pillows or toys.

Ensure the bassinet is placed at a reasonable distance from curtains, blinds, heaters and power points.

Ribbons or lace associated with the bedding may entangle the infant.

Promptly replace worn out or broken parts.

Please keep medication, string, elastic, small toys or small items such as money out of reach from any position in the bassinet.

#### **RECOMMENDED MATTRESS SIZE (SUPPLIED)**

This bassinet has been manufactured for use with a mattress which measures 415mm wide x 765mm long x 30mm in thickness. The width and length are specified because it is important that the gaps between the mattress and the sides and ends of the bassinet will not exceed 40mm. This is to minimise the risk of a child's limb becoming caught in the gap.
