## Sleep Trainer & Clock

### Instruction

This is a sleep trainer for toddlers. Parents can set the time for the backlight to change colour so the toddlers can easily distinguish if it is daytime or night time.

This sleep trainer also has child friendly icons (Sun and Moon) so it is attractive to toddlers

The backlight of the clock can be adjusted into 7 levels of brightness, so that it is not too bright for a dark room.

A child key lock function is also available to prevent children from changing the setting.

Power on: Use a sharp tool to press the power switch to ON, LCD with full display.

There are total of five buttons: [MODE], [SET], [+], [-], [ON/OFF].

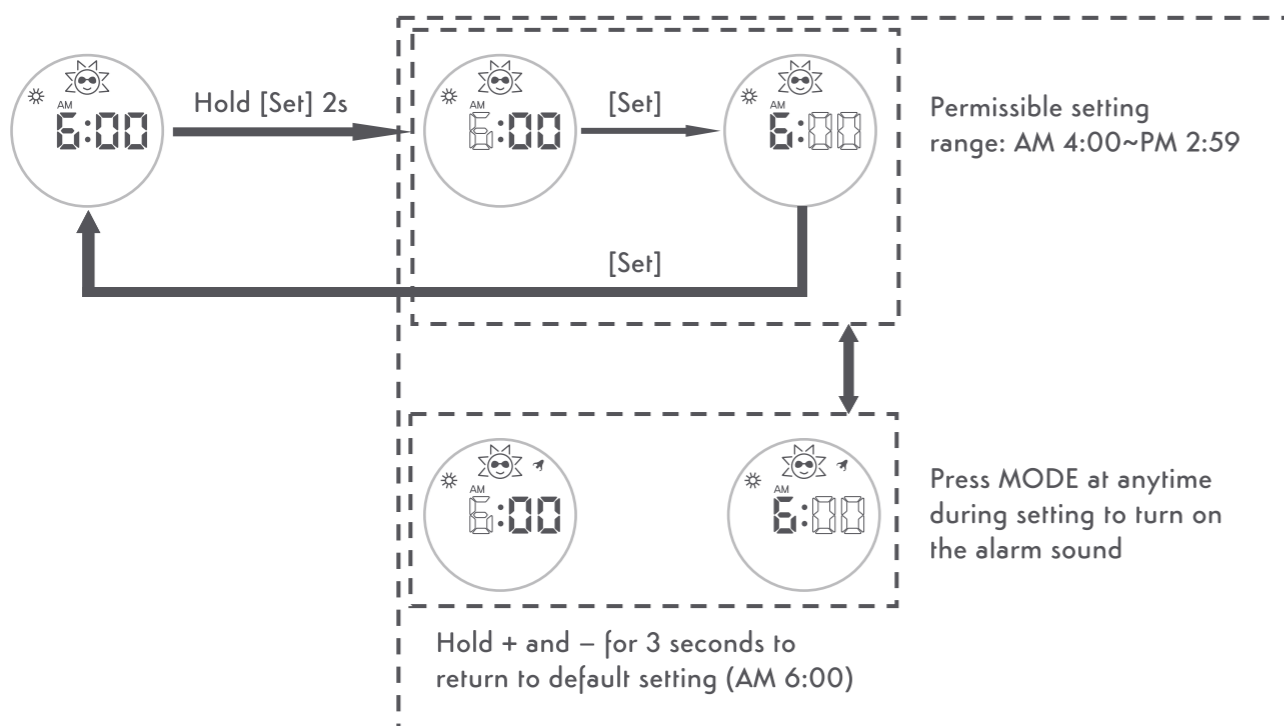

#### ON/OFF

**MODE** : Press MODE to switch from CLOCK page, Daytime setting page and Night time setting page.

To set daytime (backlight will change from blue to Yellow, default AM 6:00):

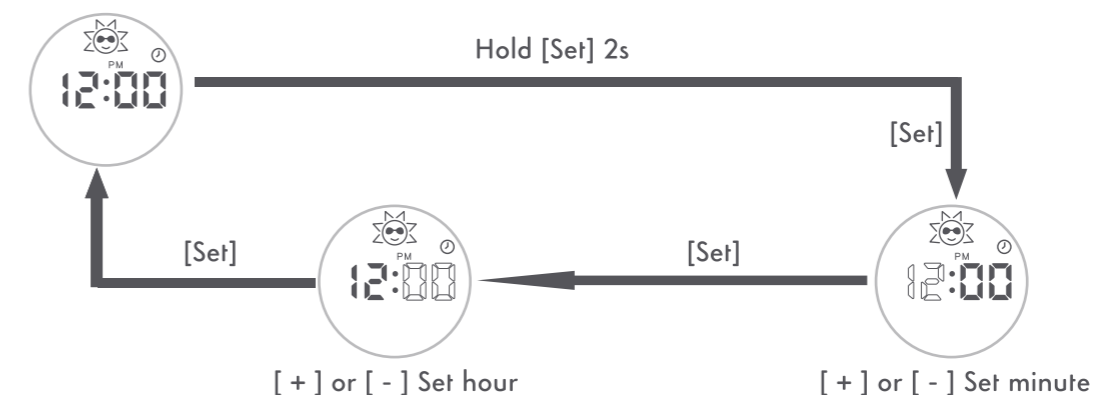

\*\* The alarm sound is music that can be stopped by pressing any button\*\*

To set night time (backlight will change from Yellow to Blue, default PM 6:00):

**CLOCK**: To set clock:

**RESET**

**Key Lock**

**Low battery alert**

**TIPS:**

If you do not use the product for a long time, we recommend charging product in two months, in order to protect the life of lithium batteries.
