

**Create your own  
Cosplay Sound Glove!**

Create your own Cosplay Sound Glove. COSVOX Sound Modules let you download and play epic sound effects, iconic voice lines, or even a stunning musical soundtrack to enhance your Cosplay costumes. Unleash your Cosplay creativity with this awesome audio accessory. Multiple sound effects can be stored and played on each button. Download, power up and let the audio magic begin!

Please refer to the User Guide for the Sound Module. The wires from the Palm Module must be plugged into the sockets marked S1, S2 and S3. The three buttons on the Palm module will activate the sounds stored on the memory inside the sound module. Please note which wires plug into which socket, so you can organise which sounds are played when each button is pressed. Please refer to the Sound Module User Guide for full details.

The Wrist Pocket is made from stretch fabric, one size fits all. There are two stretch pouches, one on the front and one on the rear. The Sound Module, Battery Pack and Speaker Module can be stored in either of these pouches. There are holes in the Wrist Pocket that allow you to feed cables through. Please note that there are also two hidden holes inside that allow you to feed wires between the front and rear pouches.

The hole at the rear of the Wrist Pocket will allow you to feed wires from the Sound Module out to a Power Bank or Sound Amplifier that you may have stored in a different area of your costume. Please note that if you do prefer to use a Power Bank and a Sound Amplifier, you will not need to connect and store the Battery Box and Speaker Module that is supplied with the pack. This will reduce the amount of bulk in the Wrist Pocket.

If you require any help or advice, please contact Customer Services who will be pleased to assist you.
