Type/application/remarks

Hooks designed specifically for Scandinavian saltwater fishing, but has many other applications. All Nordic Salt hooks are in black nickel finish.

Straight eye, "short" streamer, straight eye.

Very strong, straight shank, slight down-eye.

Classic, long shank streamer hook.

Stinger hook, large hook gape, slight up-bent hook point.

Specifically designed for classic, Scandinavian style shrimp imitations like "Pattegrisen". Heavy wire to eliminate the need for extra weighting of the hook, slight up-bent shank to eliminate the fly turning up side down.

Slight continuous bend, slight up-bent hook point. The style was for many years the standard for shrimp imitations in Scandinavia. Also popular for generic palmer style wet flies. Relatively light wire makes it useful for foam flies as well.

Short shank, nearly continuous bend, large gape, up-bent hook gape.

Short shank, relatively light wire, up eye, up-point, perfect for trailing hooks.

Designed for the most hardcore, tropical challenges. All Salt hooks are with A-Steel finish.

Straight eye, short(ish) shank streamer, strong wire.

Specifically designed for classic, Scandinavian style shrimp imitations like "Pattegrisen". Heavy wire to eliminate the need for extra weighting of the hook, slight up-bent shank to eliminate the fly turning up side down.

Developed specifically for the strongest of saltwater species; gt, tarpon, tuna etc.

For gammarus imitations, boneflies, perfect for Surf Candy-style flies.

Short shank, strong wire, straight wire, Perfect for smaller baitfish imitations, small Surf Candy-style flies, Crazy Charlies etc.

Designed for fishing for big predators as pike, muskies, bass etc.

Excellent allround hook for pike and muskie.

A classic hook in Scandinavia for pike streamer.

Large hook gape, relatively light wire.

Heavy wire, large gape, jig-style hook for weedless fishing. Eye not inline with shank as in normal jig hook.

Large hook gape and and exaggerated jig-style eye.

Developed with Gunnar Brammer with input from Paul Monaghan. Perfect for weedless designs and designed with plenty of tying room and short, straight shank sections for weighting, rattles etc. Extremely popular.

For lighter dressed flies, weedless fishing.

Large gape, slightly up-bent hook point, up-eye for inline trailing with trailer-wire.

Designed for anadromous fish as salmon, sea trout, steelhead.

Light wire, slightly round bend, drops a little at the back. Black coating. Tapered loop-eye, up-eye.

Heavier version of HR410, black nickel finish.

A Classic Bombar hook, developed with Steve Silverio. Light wire, tapered loop eye, down eye, Limerick-style bend. Works very well for Spey-style flies and other wet flies.

A modern, near-continuous bend, up-eye.

A modern, near-continuous bend, up-eye.

A classic, long shank, straight shank, up-eye low water double.

A short shank, straight shank, up-eye double.

A short shank, straight shank, up-eye double.

A short shank, straight shank, up-eye double.

A short shank, strong single hook, developed for tube flies.

A short shank, strong double hook, developed for tubeflies. Turned up-side-down on the tube fly, it helps prevent snags.

A classic, strong treble hook for tube flies.

Classic trailer hook, popular for Intruder-style flies. Pronounced up-eye ensures perfect in-line fishing with the trailer wire.

Classic Esmond Drury-style, song shank treble hook. Popular for General Practitioners and on Iceland.

Classic Esmond Drury-style, song shank treble hook. Popular for General Practitioners and on Iceland.

Classic Esmond Drury-style, song shank treble hook. Popular for General Practitioners and on Iceland.

Freshwater hooks for trout, grayling, whitefish etc. All FW hooks are in black nickel finish.

Dry fly

Dry fly, finer wire than FW500.

Dry fly, shorter shank than FW500 and FW502.

Relatively larger hook gape, straight eye.

A curved dry fly hook, straight eye.

Same as above, but in #20 and 22.

Emerger hook, large hook gape, slight up eye.

"Klinkhamer" style dry and emerges. More curve than FW520.

Long shank, slight curved, straight eye hook for caddis and larger emergers.

Curved nymph hook for heavier nymphs and czech style nymphs.

Short shank jig-style hook.

Longer shank than above, jig-style hook.

Traditional, straight shank, down eye nymphs hook.

A longer, stronger dry fly hook for hoppers, foam-flies etc.

A classic, strong, sligt limerick bend wet fly hook.

Designed for large wet flies for large trout.

Large hook gape, straight shank, straight eye, light yet strong wira.

Stinger/Aberdeen hybrid bend, straight eye, strong wire.

As TP610, but longer shank.

Specifically designed for modern, articulated trout streamer as Drunk And Disorderly, Sids etc.

Same bend as SA274 as NS172, but in black nickel coating.
