- Dual USB Handlebar Charger
- 2AMP Hardware Cable Adapter
- 5V 2A 2 USB + 12V Adapter
- 1 Metre USB Cable for Tough Cases
- 12V 4.8 AMP Motorcycle Mini Dual USB Charger

HEATED GRIPS

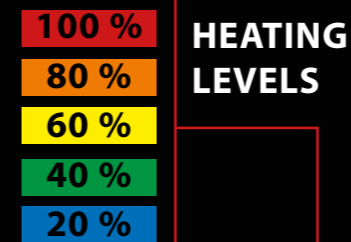

£109.99 RRP

These high-end advanced heated motorcycle grips will keep your hands warm whatever the weather. The grips feature an integrated switch and five different temperature settings allowing you to adjust your comfort on the move.

120mm or 130mm in length, the grips are easy to fit and use out of the box. Temperature change is always fast and safe, allowing you to adjust to sudden weather changes.

In addition, the grips are equipped with a low battery warning and will store the last used temperature setting in memory meaning less time wasted changing settings and a pair of grips that will be good to go whenever you are.

ACTION CAMERA GRIPPER HELMET MOUNT

£49.99 RRP

The Dango Design Motorcycle Gripper Mount - suitable for GoPro / DJI / Drift and Insta360 action cameras. Perfect shots with no permanent helmet modifications necessary. This strong, grippy mount will attach in seconds to the chin section of your helmet and allow you to adjust your camera easily to find the perfect angle.

Mounting action cameras onto the side of your helmet can become tiresome quickly due to the introduction of a weight imbalance. Additionally, if you really want a FPV (first person view) perspective, you need to mount as close to your eye line as possible.

This mount is very versatile and can also be used to grip to various bike surfaces, pieces of equipment, or even geographical features to give you unrivalled flexibility in your shots.

NEW! QUICKFIRE MINI LED

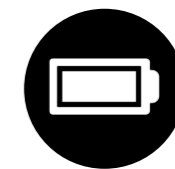

£99.99 RRP

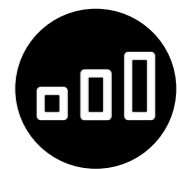

The Dango Design QuickFire is an ultra-compact, lightweight, and bright LED light kit. When paired with a Gripper Mount, it will quickly light up any trail, campsite, or hard-to-see area. The external lithium-ion rechargeable battery provides enough power to run the light for over 3 hours in high mode. Three power modes, low, medium & high, give just the right amount of illumination while opting for maximum run time.

HF2 DUAL 5.0 HEADSET

£59.99 RRP

Twiiins HF2 DUAL 5.0 is easy, versatile and delivers a good 2 speaker sound experience. Ideal for Urban and Road riding.

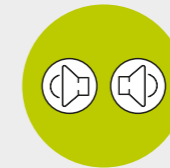

Designed for those who use their vehicle often throughout the week, but also those who enjoy to ride over the weekend. This product is a very safe hands free way to access calls, music and navigation info. The two speakers grant a good sound quality even at high road speeds.

Twiiins is easily connected to your smart phone and sound is transferred smoothly between devices to deliver an unparalleled wireless helmet communication experience.

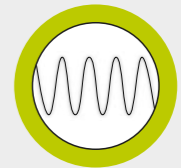

Voice Answering

Answering by voice command is a function which allows you to a phone call without taking hands off the handlebar or your eyes off the road.

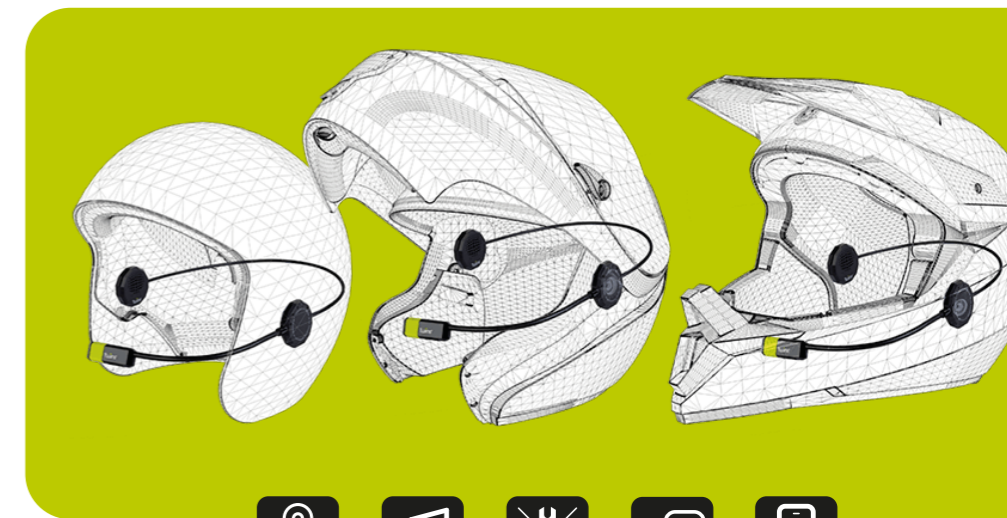

Two Speakers

By using a unique Bluetooth® 5.0 technology and matching audio speakers, Twiiins combines the perfect sound quality with complete environmental awareness.

Noise Reduction

Wind and road noise are cancelled out, for optimum sound even when riding at high speed.
