

Data Sheet

Safescan 2210 Banknote Counter

CASH SORT

The Safescan 2210's back-loading hopper can hold up to 300 banknotes and accurately count them, up to 1.000 notes per minute. Today's currencies are printed with sophisticated security features that make it hard for counterfeiters to succeed. The 2210 automatically checks every banknote for two distinct security traits: UV markings and bill size. It will pause and beep to alert you when it encounters a suspicious bill; simply remove the offender and press start to resume counting

Main Specifications

Currencies	For all currencies
Counting modes	Free sheet counting with / without detection
Detection method	Automatic verification Ultraviolet, size (height)
Counting speed	1000 notes per minute
