

DIY Spooky Halloween Craft

What you'll need:

- Paint in a variety of colors like orange, green, or black!
- Paintbrush
- Googly eyes
- Pipe cleaners (we used green for our pumpkin's stem!)
- Construction paper
- Glue
- Tape
- Sharpie
- Foam stickers
- Popsicle sticks

Steps:

1. Lay 6-7 popsicle sticks next to each other and glue them together.
2. Add two smaller popsicle sticks on the back for support, gluing them horizontally.
3. Paint your glued popsicle sticks any color you wish, like orange for a pumpkin, green for frankenstein, or black for a haunted house!
4. Once dried, add your googly eyes on top of the paint.
5. Feel free to add any mouth pieces or hair pieces - these can be cut out of construction paper or drawn on with a marker.
6. Add any additional stickers or foam pieces for decoration.
7. Optional: Glue magnets to the back and hang your spooky masterpieces on the fridge!
