

♥ DIY Bird Feeder ♥

What you'll need:

- Bread
- A toaster
- A fun shaped cookie cutter
(we used a star but anything will work!)
- A straw
- Peanut butter
- Plastic spoon
- Paper plate
- Bird seed
- Your favorite colored yarn

Steps:

- 1 With the help of a grown-up, toast a slice of bread in the toaster
- 2 Use a cookie cutter to cut the shape out of the toasted bread
- 3 Use the straw to poke a hole in the top of the bread. This is where you'll put the string!
- 4 Grab a spoonful of peanut butter and, using the plastic spoon, coat the entire piece of bread
- 5 Carefully screw the jar lid tightly shut.
- 6 Spread your birdseed evenly on the paper plate
- 7 Gently pressed the peanut butter coated bread onto the birdseed
- 8 Once your bread is covered in birdseed, let the entire piece harden for about an hour
- 9 String your yarn through the hole and tie a knot at the end
- 10 Hang your homemade bird feeder from a tree and enjoy bird watching!
