Your Name:

Welcome to your lecture!

Aim:

The course, when completed, will provide the student practitioner with the necessary skills and knowledge to complete the procedure in a professional manner. The course will cover anatomy and physiology and the necessary and legal requirements and the consultation process. At the end of the course you will be able to complete the treatment process from pre-treatment, the application of the treatment and advise the client on after care.

Objective:

That on completion of the course all students/practitioners will be competent and professional in relation to the procedure and be able to perform at the highest standard to ensure that clients receive the best possible advice and treatment and they will be confident to recommend you and your services to others.
