HIPP2034

HiPP 1+ Years Combiotic Kindermilch (Toddler Milk) Formula (600g) - German

Age: 12 Months & Up

Yield: Approximately 186oz of Formula

Did you know that young children require on average 3x more calcium and 7x more vitamin D than adults*? Don't worry... HiPP has your little one covered with Kindermilch 1+.

Kindermilch, is often literally translated as "children's milk" by other companies in the US, but we prefer the term "toddler's milk." This Kindermilch for 1 year and up (German: Ab 1+ Jahr) is intended for toddlers that are 12-24 months of age, while the 2+ Years Kindermilch stage is intended for toddlers between the ages of 24 and 36 months.

The added prebiotics and probiotic cultures in this Kindermilch (like those found in breastmilk) promote gut health and help to soften stool. Added vitamin D and calcium work together synergistically to promote bone growth and development, while added vitamin C helps to develop baby's immune system.

* This statistic comparing adults and children is based on relative nutrient requirements per pound of bodyweight.

- ✓ Probiotics based on strains found in human breast milk
- ✓ Vitamins C & D for baby's immune system and bone growth
- ✓ Calcium for healthy bone development
- ✓ Omegas 3 and 6 for brain & eye development
- ✓ Prebiotics for gut health and softer stool

- ✓ No corn-based sweeteners
- ✓ No maltodextrin
- ✓ No gluten
- ✓ No GMOs
- ✓ No added starch

INSTRUCTIONS

1. Boil water freshly and then cool down to 122 degrees Fahrenheit (50 °C).
2. Pour the required amount of boiled water into a clean "sippy cup" (bottles are not recommended beyond 12 months for reasons pertaining to dental hygiene).
3. Using the scoop provided with your box of toddler's milk, add the required number of scoops of powder.
4. Stir / mix / shake thoroughly and cool to drinking temperature (approximately 98 degrees Fahrenheit) and then serve.
5. Add the remaining half of the water to the bottle and shake again.
6. Cool to drinking temperature (approximately 98 degrees Fahrenheit or ~ 37 °C) and ALWAYS test the temperature of the milk before feeding to avoid scalding or burning your little one.

There are many mothers that regularly use distilled water without boiling it, apparently with no negative consequences. We cannot recommend this approach and there are actual reasons even the US FDA recommends pre-boiling tap or distilled water instead.

MIXING AND FEEDING INSTRUCTIONS (HiPP KINDERMILCH 1+)

SERVINGS PER DAY	WATER (OZ)	# OF SCOOPS
2	5	5

DON'T FORGET

- ONCE YOU HAVE OPENED THE INNER FOIL BAG CONTAINING YOUR FORMULA, YOU SHOULD USE WITHIN 2 WEEKS. AVOID STORING IN AREAS OF HIGH HEAT OR HUMIDITY.
- IF MIXED FORMULA IS NOT CONSUMED WITHIN AN HOUR, YOU SHOULD DISCARD IT.
- DO NOT MICROWAVE BOTTLES OR FORMULA.
