## HiPP Stage 2 Organic Combiotic Follow-On Formula (600g) - Germany

**Age:** 6 Months Onward

**Yield:** Approximately 144oz of Formula

HiPP Combiotik Stage 2 is suitable for infants between 6 and 10 months of age. HiPP Combiotik Stage 2 contains iron for cognitive development, vitamins A, C and D for the immune system and omega-3 (ALA) for brain and nervous system development, beyond other important vitamins and minerals. Stage 2 helps to satiate baby with selected, organic starches, which also help to make this milk beautifully creamy. Added probiotics support gut health, while added prebiotics help to soften baby's stool, as with exclusively breastfed babies.

- ✓ Probiotics based on strains found in human breastmilk
- ✓ Vitamins A, C, D for baby's immune system
- ✓ Iron for cognitive development
- ✓ Omega-3 for brain & eye development
- ✓ Prebiotics for gut health and softer stool
- ✓ No corn-based sweeteners
- ✓ No Maltodextrin
- ✓ Certified organic by EU
- ✓ No gluten
- ✓ No GMOs

## INSTRUCTIONS

Preparation for all powdered formulas (also consistent with US FDA guidelines):

1. Boil water freshly for each of baby's meals and allow to cool down to 120 degrees Fahrenheit (50 °C) before mixing with formula powder.
2. Pour in ½ of the necessary amount of boiled water into a clean and sterilized bottle.
3. Using the scoop provided with your box of formula (note that spoon sizes vary by brand and even lot), add the correct number of leveled scoops of powder (1 leveled scoop of powder per 1oz / 30ml of water).
4. Close the bottle with the nipple and cap and vigorously shake.
5. Add the remaining half of the water to the bottle and shake again.
6. Cool to drinking temperature (approximately 98 degrees Fahrenheit or ~ 37 °C) and ALWAYS test the temperature of the milk before feeding to avoid scalding or burning your little one.

There are many mothers that regularly use distilled water without boiling it, apparently with no negative consequences. We cannot recommend this approach and there are actual reasons even the US FDA recommends pre-boiling tap or distilled water instead.
