

A Demo a Day™—A Year of Chemical Demonstrations

Table of Contents

Vol. II

Chemistry Pledge	i
About the Authors	viii
Acknowledgments	ix
Safety Procedures	x
Disposal Procedures	xi
Solution Preparations	xii
Demonstration Supplies	xvi
Chapter 1 — Methods of Chemistry & Measurement	
A Pie in the Eye	2
Acids or Bases, Which Are More Dangerous?	3
Waft It—Don't Sniff It!	4
Mysterious Sunken Ice Cube	5
Hypothesizing	6
Observation and Generalization	8
Prefixes are Not Affective	10
A Gram is a Gram	11
Significant Figures in Volume Measurements	12
Headroom	13
Consistency	14
Acids—A Real Eyesore	15
Demonstration Light Box—You Can Build It!	16
Chapter 2 — Properties of Matter	
Creating Gold—An Alchemist's Dream	20
Chemical and Physical Properties	22
Fire Writing	23
Sodium: An Active Metal	24
Heterogeneous vs. Homogeneous Mixtures	26
Aqua Regia	28
The Incredible One-Way Screen	29
Edible Mail	30
Vitamin C Testing	32

Chapter 3 — Thermochemistry: Heats of Reaction

The Brick Trick	36
Endothermic Reaction Between Solids	37
Bottle Launching	38
A Bigger, Better Boom	40
Heat of Reaction	42
Heat of Solution	43
Always Add Acid (AA)	44
Small Molecules in Motion	45
How Hot is Hot?	46
Heat Capacity—An Analogy	47

Chapter 4 — Properties of Matter

Proportionality	50
Red and Green Fire	51
Flame Tests Made Easy	52
Absorption Spectra.	54
Absorption Spectra on the Overhead Projector	56
Light is a Particle Too!	58
A Simple Electroscope.	60
Saint Patrick's Day Demo	61
Hund's Rule (The Empty Bus Seat Rule)	62
Flashy Candy	63
Magnetic Electrons	64
Quantized Phosphorescence.	65
Paramagnetism.	66

Chapter 5 — Chemical Reactions and Stoichiometry

Ions Need to Get Together	70
Chemistry is Recyclable	72
Metal Reactions—Single Replacement	74
Mysterious Appearance of Copper.	76
Was This Supposed to Happen?	78
Instant Smog	80
The Jumping Flame	82
Dynamite Soap.	84
Limiting Quantities	86
Dehydrating Action of Sulfuric Acid: A Twist.	87
Corn•13H ₂ O—A Hydrate	88
Photochemical Change.	89
Compare Molar Volumes	90
Synthetic Odors from Esters	92

Chapter 6 — Descriptive Chemistry

Preparation and Properties of Oxygen	96
Sal Volatile	99
Preparation and Properties of Carbon Dioxide	100
Preparation and Properties of Hydrogen	102
Preparation and Properties of Chlorine	104
Preparation and Properties of Sulfur Dioxide	106
Preparation and Properties of Ammonia	108
Fun With Carbon Dioxide	110
Spirits of Hartshorn—Liquid Ammonia	112
Preparation and Properties of Nitric Oxide and Nitrogen Dioxide	114

Chapter 7 — Phases of Matter

Superheated Steam	118
Vapor Pressure	120
Which Evaporates First?	122
Gas Diffusion	124
Definite Volume of Liquids	126
Expansion of a Gas	127
Triple Point of Water	128
Melting Dry Ice	130
Depressive Soda Pop	132
Fractional Distillation	134
Fractional Crystallization	136

Chapter 8 — The Nature of A Gas

Boyle's Marshmallow	140
Methane Bubbles	141
Refrigerants Are Cool Gases	142
Diffusion of Bromine Vapor	144
Oxygen in Air	146
A "Mole" of CO ₂	148

Chapter 9 — Atomic Structure and Bonding

Colorful Electrons	152
Effective Collisions	154
Hydrogen Bonding in Liquids	156
Hydrogen Bonding	158
Chiral Crackers	160
Visualizing Nuclides	161
A Sigma Overlap	162
Colorful Copper Compounds	163
Induced Polarity	164
Bubble Molecules	165
Testing for Double Bonds	166
Measuring the Size of the Molecule	168

Chapter 10 — Periodicity

Mendeleev's Law Demonstration	172
Missing Pieces	173
All in the Family	174
Periodic Reactions	175
Periodicity of Chlorine.	176
Why Isn't the First Element Replaced?	177

Chapter 11 — Solutions and Colloids

What's in a Solution—The Cup Doesn't Runneth Over!	180
Solutions, Colloids and Suspensions	182
Like Dissolves Like	184
Gases Have It Backwards.	186
Solubility Exception.	188
Differential Solubility	189
Most Hydroxides Are Insoluble.	190
Concentration Dependence of a Reaction	192
Molarity vs. Molality	194
Chemical "Cells"	195
Crystallization of Lead Chloride	196
The Balloon in the Flask—A New Approach	198

Chapter 12 — Acids, Bases and Salts

Lewis Acid–Base Reaction	202
Percent Ionization	204
Producing an Acid–Base Indicator Paper	205
Acid Strength	206
How to Blow Out a Lightbulb	208
Organic Rainbow	210
Buffer Capacity	212
What Kind of Salt is This, Anyway?	214
Acid Rain	216
Preparation of a Solid Acid	218

Chapter 13 — Kinetics, Equilibrium and Thermodynamics

Concentration and Reaction Rates	222
Black Magic with Iodide Solution	224
Paper Clip Catalyst	226
Hydrogen Gas Production—A Catalyzing Experience	227
Equilibrium Is Not Fair	228
Aquarium Analogy for Equilibrium.	229
The Rate of Funnels.	230
Common Ion Effect	232
Common Ion Effect Revisited	233
K_{sp} Balance	234

K_{sp} Balance Revisited	236
Exploding Bread Crumbs	237
Driven to React	238
Dynamic Popcorn	240
Fire Syringe	241

Chapter 14 — Redox

Oxidation States of Iron	244
Reduction of an Ore	247
Disproportionation of Cuprous Oxide	248
Wine to Water to Milk	250
Cleaning Silver	251
The Easiest Chemiluminescent Reaction	252
Presto Change-O	254
Cleaning Up	256

Chapter 15 — Electrochemistry

Ions on the Run	260
Nickel Plating	262
Thermocells are Simple Batteries	264
Writing with a Halogen	266
Charging My Batteries	267

Chapter 16 — Polymer Chemistry

Polymers—An Introduction	270
Monomers Make Polymers	273
Tensile Strength of Polymeric Films	274
Polymer Crystallinity	276
Halogenated Polymers	277
Thermo-Polymers	278
One-Way Polymer	280
