ELECTRONIC DIGITAL CALIPER

TECHNICAL SPECIFICATIONS

Measuring range:

0-150mm/0-6in, 0-200mm/0-8in, 0-300mm/0-12in.

Resolution:

0.01mm/0.0005in.

Accuracy:

 ± 0.02 mm/0.001 in (<100mm).

 ± 0.03 mm/0.001 in (>100-200mm).

 ± 0.04 mm/0.0015 in (<200-300mm).

Repeatability:

0.01mm/0.0005 in.

Max measuring speed: 1.5m/sec, 60in/sec.

Measuring system:

Linear capacitive measuring system.

Display:

LCD display.

Power:

One silver oxide battery 1.55V, type SR44.

capacity: 180mAh.

Working temperature: 5°C-40°C/41 to 104 degree F.

Influence of humidity: Notimportant under 80% of relative humidity.

NOMENCLATURE

1. Outside measuring faces

3. Depth measuring blade

5. Beam

7. Battery compartment lid

9. Display (LCD)

11. Thumb roller (depending on the model)

13. ZERO switch

- 2. Inside measuring faces
- 4. Step measuring faces

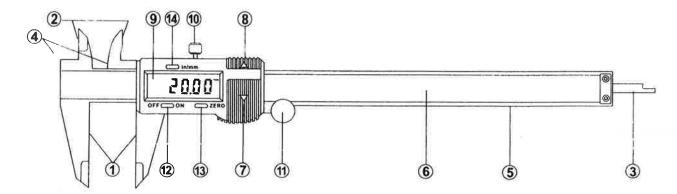

6. Main scale

8. Output connector

10. Slider clamp screw

12. Power ON/OFF switch

14. Inch/mm conversion switch

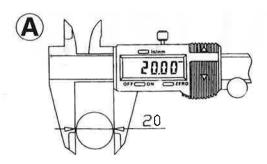

APPLICATIONS

- 1. PREPARATIONS:
 - (1). Slider can be removed only after the locking screw(No. 10 item of the Nomenclature) is loosened
 - (2). Wipe clean all the measuring faces and caliper ber. No organic solutions are allowed.
 - (3). Check to see if all the buttons, switches, and LCD display respond well.
- 2. BASIC MEASURING METHODS:
 - (1). Lossen the locking screw.
 - (2). Switch the unit on with a press on "ON" button. Then select the unit system needed by pressing Inch/Metric

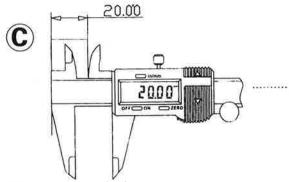

button.(Each time the button is pressed, inch and metric digits will be displayed alternative).

(3). Apply normal measuring pressure on slider to close the external measuring jaws. Then press "zero" button to reset the display to zero.

A. Measurements of external dimensions.

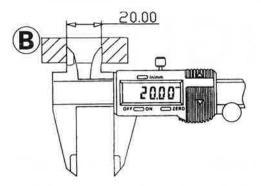

C. Measurements of steps.

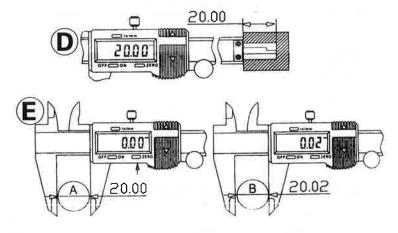

E. Differential method measurement (Application of zero setting)

B. Measurements of internal dimensions.

D. Measurements of depth.

OFF ON

MAINTENANCE INSTRUCTIONS

1. Keep the caliper clean and dry(Liquid can damage the slider)

2. Faces should be cleaned gently with cotton fabrics. Never use petrol, acetone and other organic solutions.

3.In order to save power, turn off the unit when caliper is going to stay idle for some time.

4. Never apply any electric pressure on any part of the caliper and never use an electronic pen for the fear of damaging its chip.

5. For other notes please refer to the conventional calipers.

•BATTERY REPLACEMENT

Flashing of digits shows a flat battery. Take off the battery cover in the direction shown by the arrow and replace the battery (positive side facing out).

TROUBLE SHOOTING

Failure	Cause	Measure
Five digits flash simutaneo usly, about once per sec.	-	Replace the battery.
Display doesn't change when the slider is moved	Accidental trouble in circuit	Take out battery and erset it after 30 sec.
Less accurate then specifi -ed but with -in+0.1mm.	Dirtin the sensor.	Remove slider cover and its assembly, clean compressed air (5kg/cm).
No display on LCD	1. Battery in poor contact. 2. Battery voltage under 1.4V.	Remove battery cover and adjust the battery scat, keep good connection. Replace battery.
