IMPACT REPORT

BUSINESS CANNOT CONTINUE AS NORMAL...

Trade and commerce are an essential part of our democratic, capitalist society. Nevertheless, businesses cannot persist in operating solely to maximise profits for shareholders without regard for the environmental impact or effect on human health, particularly in the case of food and beverage companies.

Prodigy was created with this premise in mind, to enter the food industry while considering people, planet and palate in every aspect of its operation. Of course, profit is necessary for growth and success, but this aspect can coexist with the goal of improving human health, reducing carbon footprint, and making a positive impact on society and the world.

We are an ESG, Impact Business focused on making and inspiring change in the food industry and beyond. B Corp and Carbon Neutral Certified, Prodigy is living proof that delicious products can be made without using toxic refined sugar, highly processed ingredients, single-use plastic, and environmentally harmful materials such as dairy and palm oil.

We like to do what we say and say what we do, so here is our first annual Impact Report highlighting the impact we have as a business selling delicious Chocolate, only better.

We put one of these in each party bag for our 6 year-old's birthday as we wanted to make the occasion plastic-free; they were a big hit. Thank you, Prodigy!

THE DREAM

Saw this company at a food show last month. Tried, tested, ordered 3 cases of the Milk Choc digestives on the journey home. Best biscuits I've had since becoming allergic to dairy & egg (and I'm also wheat free). THE DREAM. Highly recommended!
