<b>Title:</b>	SKULLY Release Note (iOS App)				

## iOS Phone App v2.0.5

Improvements include:

- Fixed QR code scanner during first time user on-boarding processes.
  - A bug related to parsing the QR code after being scanned during the beginner on-boarding process has been resolved.
- Built-in-music player removed.
  - Customer feedback suggested using external music players of their choice was preferred. The built-in Spotify player has been removed and now any music player (Spotify, Pandora, Apple Music, etc.) can be used.
  - Any issues should be reported through our customer service care email address and include the model of phone and version of the Android operating system being used.
