EARSETS

The popular RTS earsets are precisely designed for inconspicuous listening while on camera. Used by nearly all major television networks and stations, we have surpassed industry standards. The extremely efficient miniature driver element requires only nominal operating power and enables the announcer to hear program cues while working with a live microphone. The units are also suitable for many other applications such as live theater script prompting.

TYPICAL SET-UP

To provide optimum versatility, the announcer's earset is made up of interchangeable components that simply snap together. Users can construct a version of the announcer's earset that best suits their particular needs. Some popular combinations are available as a standard configuration; these are listed below.

Complete Earsets

Telethin Magnetic Receivers

RTR-04	15 Ω
RTV-04	125 Ω
RTW-04	500 Ω
RTX-04	1000 Ω
RTY-04	2000 Ω

Telethin Magnetic Receivers, available in 5 different impedances, permits choice of impedance for any application. For inconspicuous use, the receiver is extremely small and lightweight.

Standard Telethin® Cord Sets

The standard earset system comes equipped with a 5', low luster gray or beige cord with a 1/4" connector. A variety of other cords with or without volume controls are available as components.

- CMT-95** Straight cord with sub-miniature straight connector
- CMT-98** Straight cord with straight miniature connector
- CMT-2** Straight cord with 1/4-inch connector

- CMT-92** Straight cord with right angle miniature connector
- CCX-2** Coiled cord with right angle miniature connector
- CCT-2** Coiled extended cord with 1/4" connector

Eartubes

These inconspicuous clear plastic tubes carry the sound effectively from a RTS Telethin receiver to the talent's ear without revealing the cord to the camera. The clear tubes are available in 3 versions. All connect easily to a RTS eartip, earcone or any size earmold and have a handy clothing clip to secure the system in place.

- ET2** Coiled acoustic eartube with clothing clip for use with earmolds or eartip
- ET4** Coiled acoustic eartube with clothing clip for use with earcones — comes with one each — S, M & L earcones
- ET3** Straight acoustic eartube with clothing clip for use with earmolds or eartip

Earmolds/Earcones/Eartips

For maximum comfort and convenience, three pliable earmolds (S, M & L) are available for either the left or right ear. The Telethin receiver easily attaches into the earpiece directing sound into the ear canal and limiting ambient noise.

Cords

The cords with in-line volume control are equipped with clothing clips for out of sight, waist-level positioning. To avoid loss of cues, the volume control will not shut off completely.

- VXT-3** 500 Ω volume control with 1/4" connector
- VYT-3** 2000 Ω volume control with 1/4" connector

Earloops

The nylon or plastic covered metal earloop holds the eartip or receiver in place on the ear.

- AEF-3B** Nylon earloop
- AEF-2** Plastic covered metal earloop
- AFC-1** Under-chin tube and foam cushion
