

DRY DECAL INSTALLATION

Thank you for your order!

Please read the installation instructions completely before applying your vinyl decals.

Proper cleaning and preparation of the surface prior to the application of the decals is critical to the long term success of the decals. The following cleaning and surface preparation conditions must be followed immediately prior to application. Failure to adhere to these requirements can cause adhesion loss and therefore reduce the durability and performance of the decals. Use denatured or isopropyl alcohol (rubbing alcohol) and a lint free soft towel to clean painted application areas only. **DO NOT USE RUBBING ALCOHOL ON PLASTIC!** Ensure that the surface is absolutely clean before applying the decals.

Our decals should only be applied to a cool, shaded surface between 60F-80F. Never apply decals below 50F.

These decals are installed dry via the provided transfer tape. While not necessary, we recommend using a strip of masking tape to make a guideline on the desired location for which to align the letters horizontally. Slowly peel the transfer tape from the backing paper, ensuring that the vinyl letter separates from the paper and stays on the transfer tape.

Holding the left and right sides of the transfer tape, align the bottom edge of the decal with the masking tape and slowly lay it down on the surface. Do this very carefully and slowly because once the decal contacts the surface it cannot be removed without damaging the decal. Don't worry if it is not exactly centered. Slight variations in the decal positions are rarely noticeable.

Firmly press down on the surface of the transfer tape to adhere the decal to the surface.

Leave the transfer tape on the applied decal for 10-15 minutes to allow the decal to fully bond to the surface.

Slowly peel the transfer tape away at a 180 degree angle, ensuring that the vinyl does not lift up with the transfer tape.

Use your fingers to press down on the edges of the decals to ensure they have adhered properly.

Repeat with the remaining letters to complete your application.

Please allow 24 hours for the vinyl decals to completely adhere to vehicle. Do not get the vinyl decals wet during this time.

Please don't hesitate to contact us if you have any issues or questions about installing these decals on your vehicle, or if you need additional decals.

Thanks!
