

## JEEP CHEROKEE/GRAND CHEROKEE EMBLEM INLAY DECAL INSTALLATION

Thank you for your order!

### **Please read the installation instruction completely before applying your vinyl decals.**

Proper cleaning and preparation of the surface prior to vinyl application is critical to the success of the decals. The following cleaning and surface preparation conditions must be followed immediately prior to application. Failure to adhere to these requirements can cause adhesion loss and therefore reduce the durability and performance of the decals. Use denatured or isopropyl alcohol (rubbing alcohol) and a lint free soft towel to clean the surface of the badges. Ensure that the badges are absolutely clean before applying the decals.

These decals are installed dry via transfer tape. Slowly peel the transfer tape from the backing paper, ensuring that the vinyl letter separates from the paper and stays on the transfer tape.

Holding the left and right sides of the transfer tape center the decal over the corresponding letter and slowly lay it down on the surface of the badge so that the chrome is visible around all the sides of the decal. Do this very carefully and slowly because once the decal contacts the surface of the badge it cannot be removed without damaging the decal. Don't worry if it is not exactly centered. Slight variations in the decal positions are rarely noticeable.

Lightly run the edge of a credit card or other plastic edge across the surface of the transfer tape to adhere the decal to the badge. Do this only when the transfer tape is still applied.

Slowly peel the transfer tape away at a 180 degree angle, ensuring that the vinyl does not lift up with the transfer tape.

Use your fingers to press down on the edges of the decals to ensure they have adhered properly. DO NOT use a plastic edge on the decal after the transfer tape has been removed.

Proceed to the next letter or badge.

Enjoy the new look of your Jeep!

Please allow 24 hours for the vinyl decals to completely adhere to vehicle. Do not get the vinyl decals wet during this time.

Tips:

1. Sit on a chair in a comfortable position directly in front of the badge that you are working on. Try to avoid bending over or installing these from any angle which could affect centering them on each letter.
2. When applying the decals holding the sides with your thumb and index fingers, rest the nails of your index fingers against the surface to steady your hand, then sloooooowly rotate your index fingers out and your thumbs down to press the decal against the surface.

Please don't hesitate to contact me if you have any issues or questions about installing these decals on your Jeep, or if you need additional letters.

Thanks!
