

# VELNEZ<sup>®</sup>

## The Optimal Healing Solution

VelNez<sup>®</sup> is a fragmentable composite nasal dressing that has a degradation period of approximately 3-5 days after application. The pain and discomfort with traditional nasal packing removal is eliminated with VelNez<sup>®</sup> since removal is not necessary. VelNez<sup>®</sup> also promotes healing and can reduce the clotting time. VelNez<sup>®</sup> acts as a space occupying dressing, preventing adhesion by separating the compromised mucosal surfaces while still supporting vital tissue structures. VelNez<sup>®</sup> is made of biocompatible, non-shellfish-based chitosan that comfortably fragments as it absorbs the surrounding fluids or blood.

U.S. Patent # 10,293,075B2

VelNez<sup>®</sup> has a degradation period of approximately 3-5 days

**VelNez<sup>®</sup> is a unique fragmentable nasal dressing that prevents the adhesion, pain, discomfort, and removal commonly associated with traditional nasal packs.**

Key Features of VelNez<sup>®</sup>

- Fragmentable composite nasal dressing
- Made of non-shellfish based chitosan
- Room temperature storage
- Approximate 3-5 day fragmentation time
- Fully trimmable
- Helps achieve hemostasis faster

Both size options can be trimmed to your required specifications

**VelNez<sup>®</sup> 8cm x 2cm**  
Bioresorbable Nasal Dressing  
Cat. #50-1060-5  
(5 pack)

**VelNez<sup>®</sup> 4cm x 2cm**  
Bioresorbable Nasal Dressing  
Cat. #50-1050-5  
(5 pack)

VelNez<sup>®</sup> Nasal Dressing is sold sterile, individually packed in boxes of 5, and ready to use
