

OMNITM Steth

The most comprehensive stethoscope solution in telemedicine

The OMNI-StethTM features a single button for selecting the desired auscultation area on the body, which automatically adjusts the listening frequency range to the proper level. This provides the most user-friendly experience available. The adult and pediatric heads allow for the best sound representation among digital stethoscopes.

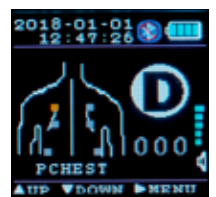

Heart

Back

Neck

Bowels

Each OMNI-Steth™ unit comes with the listening tubes and a 3.5mm audio output adaptor to allow for an easy connection in any environment. The audio output adaptor can be used with headphones and connected to a car or PC. The OMNI-Steth™ features a 1.5" screen for viewing phonocardiography, which is also captured when recording the auscultation.
