WazirX shuts down NFT marketplace

SIDHARTHA SHUKLA February 22

INDIAN CRYPTO EXCHANGE WazirX has shuttered its marketplace for non-fungible tokens (NFT), according to a notice on its website on Tuesday. "The WazirX NFT marketplace has been sunset," the notice read. "You can still trade your NFTs on OpenSea."

The NFT marketplace was launched in June 2021.

WazirX was India's largest crypto exchange until last year when the government introduced a new tax on crypto transactions, leading volumes to dry up on the platform and its rivals.

The combination of a hostile tax regime and a downturn

in crypto markets proved to be a double-whammy for India's crypto exchanges. WazirX laid off 40% of its workforce in October last year.

WazirX has been embroiled in a dispute with Binance over the ownership of the exchange. Binance announced the acquisition in a blog post in November 2019, and then clarified last August that the deal was limited to an agreement to buy certain assets and intellectual property of WazirX.The clarification came after India's anti-money laundering agency froze some WazirX assets.

Earlier this month, Binance cut off the operations services it was providing to WazirX.

Sebi asks regulated entities to beef up cyber measures

FE BUREAU

Mumbai, February 22

THE SECURITIES AND Exchange Board of India (Sebi) on Wednesday laid down a number of measures for its regulated entities (REs) to mitigate the cybersecurity threat to the securities market.

REs have been advised to define roles and responsibilities of chief information security officer (CISO) and other senior personnel and proactively monitor the cyberspace to identify phishing websites.

"The majority of the infections are primarily introduced via phishing emails, malicious adverts on websites and third party apps and programmes. Hence, thoughtfully designed security awareness campaigns that stress the avoidance of clicking on links and attachments in email can establish

an essential pillar of defence,"

the regulator said.

Vulnerability assessment and penetration testing (VAPT) of the application should be conducted on a regular basis and all operating systems and applications should be updated with the latest patches.

A strong log retention and

password policy should be implemented. Multi-factor authentication should be enabled for all users that connect using online or internet facility, and particularly for virtual private networks, web mail and accounts that access critical systems. The maker and checker framework should be implemented in a strict manner and MFA should be enabled for all user accounts, especially for those accessing critical applications, Sebi said.

Other cyber security measures advocated include deploying web and email filters

on the network, scanning emails, attachments and downloads on the host and mail gateway with a reputable antivirus solution, blocking malicious domains/IPs after diligently verifying them and restricting execution of "powershell" and "wscript" in enterprise environment, if not required.

To enhance security of cloud services, registered entities need to check public accessibility of all cloud instances in use, ensure proper security of cloud access tokens, imple-

ment appropriate security measures for testing, staging and backup environments hosted on cloud and consider employing hybrid data security tools that focus on operating in a shared responsibility model for cloud-based environments.

REs need to reduce the con-

centration risk on outsourced agencies."It has been observed that single third party vendors are providing services to multiple REs, which create concentration risk... If any cyber attack happens at such organisations, the same could have a systemic implication due to high concentration risk. Thus, there is a need for identification of such organisations and prescribing specific cyber security controls, including audit of their systems and protocols from independent auditors, to mitigate such concentration risk," said Sebi.

UK overtakes India as world's sixth-biggest equity market

THE UK HAS **SURPASSED** India as the world's sixthlargest equity market for the first time in almost nine months as a weaker pound boosted the appeal of heavyweight exporters trading in London, and Adani Group-led jitters weighed on stocks in India. The combined mcap of primary listings in the UK, excluding ETFs and ADRs, reached about \$3.11 trillion on Tuesday, some \$5.1

billion higher than their

Indian equivalents, according to **Bloomberg** data. The UK's FTSE 350 index which comprises stocks in the FTSE 100 and the domestically focused FTSE 250 has gained 5.9% so far this year, outpacing a 4.7% increase in the MSCI All-Country World index. Indian markets, on the other hand, are grappling with a weaker rupee as well as the fallout of a rout in share prices of the companies in the Adani Group.

Sebi asks regulated entities to beef up cyber measures

FE BUREAU Mumbai, February 22

THE SECURITIES AND Exchange Board of India (Sebi) on Wednesday laid down a number of measures for its regulated entities (REs) to mitigate the cybersecurity threat to the securities market.

REs have been advised to define roles and responsibilities of chief information security officer (CISO) and other senior personnel and proactively monitor the cyberspace to identify phishing websites.

"The majority of the infections are primarily introduced via phishing emails, malicious adverts on websites and third party apps and programmes. Hence, thoughtfully designed security awareness campaigns that stress the avoidance of clicking on links and attachments in email can establish an essential pillar of defence,"

the regulator said.

Vulnerability assessment and penetration testing (VAPT) of the application should be conducted on a regular basis and all operating systems and applications should be updated with the latest patches. A strong log retention and

password policy should be implemented. Multi-factor authentication should be enabled for all users that connect using online or internet facility, and particularly for virtual private networks, web mail and accounts that access critical systems. The maker and checker framework should be implemented in a strict manner and MFA should be enabled for all user accounts, especially for those accessing critical applications, Sebi said.

Other cyber security measures advocated include deploying web and email filters

on the network, scanning emails, attachments and downloads on the host and mail gateway with a reputable antivirus solution, blocking malicious domains/IPs after diligently verifying them and restricting execution of "powershell" and "wscript" in enterprise environment, if not required.

To enhance security of cloud services, registered entities need to check public accessibility of all cloud instances in use, ensure proper security of cloud access tokens, imple-

WazirX shuts down NFT marketplace

SIDHARTHA SHUKLA February 22

INDIAN CRYPTO EXCHANGE WazirX has shuttered its marketplace for non-fungible tokens (NFT), according to a notice on its website on Tuesday. "The WazirX NFT marketplace has been sunset," the notice read."You can still trade

your NFTs on OpenSea." The NFT marketplace was launched in June 2021.

WazirX was India's largest crypto exchange until last year when the government introduced a new tax on crypto transactions, leading volumes to dry up on the platform and its rivals.

The combination of a hostile tax regime and a downturn

in crypto markets proved to be a double-whammy for India's crypto exchanges. WazirX laid off 40% of its workforce in October last year.

WazirX has been embroiled in a dispute with Binance over the ownership of the exchange. Binance announced the acquisition in a blog post in November 2019, and then clarified last August that the deal was limited to an agreement to buy certain assets and intellectual property of WazirX.The clarification came after India's anti-money laundering agency froze some WazirX assets.

Earlier this month, Binance cut off the operations services it was providing to WazirX.

SIDBI forays into venture debt market

FE BUREAU Mumbai, February 22

SMALL INDUSTRIES DEVEL-**OPMENT** Bank of India (SIDBI) has made its foray into the venture debt market to address funding needs of companies.

"Along with equity investments, we are talking about the ability to provide debt. A lot of banks, even today, are not in a position within their straitjacket to provide debt to companies. So, SIDBI has gone into

what is known as venture debt,"chairman and managing director Sivasubramanian Ramann said at the IVCA conclave in Mumbai.

"It is a very small beginning, but I think we've done about four investments, and this we are doing with, in fact, the partnership that has grown among all of you. We've partnered with a few of the funds that we've supported and we've been able to get leads from those funds."

Sebi asks regulated entities to beef up cyber measures

FE BUREAU Mumbai, February 22

THE SECURITIES AND Exchange Board of India (Sebi) on Wednesday laid down a number of measures for its regulated entities (REs) to mitigate the cybersecurity threat to the securities market.

REs have been advised to define roles and responsibilities of chief information security officer (CISO) and other senior personnel and proactively monitor the cyberspace to identify phishing websites.

"The majority of the infections are primarily introduced via phishing emails, malicious adverts on websites and third party apps and programmes. Hence, thoughtfully designed security awareness campaigns that stress the avoidance of clicking on links and attachments in email can establish an essential pillar of defence,"

the regulator said.

Vulnerability assessment and penetration testing (VAPT) of the application should be conducted on a regular basis and all operating systems and applications should be updated with the latest patches. A strong log retention and

password policy should be implemented. Multi-factor authentication should be enabled for all users that connect using online or internet facility, and particularly for virtual private networks, web mail and accounts that access critical systems. The maker and checker framework should be implemented in a strict manner and MFA should be enabled for all user accounts, especially for those accessing critical applications, Sebi said.

Other cyber security measures advocated include deploying web and email filters

on the network, scanning emails, attachments and downloads on the host and mail gateway with a reputable antivirus solution, blocking malicious domains/IPs after diligently verifying them and restricting execution of "powershell" and "wscript" in enterprise environment, if not required.

To enhance security of cloud services, registered entities need to check public accessibility of all cloud instances in use, ensure proper security of cloud access tokens, imple-

ment appropriate security measures for testing, staging and backup environments hosted on cloud and consider employing hybrid data security tools that focus on operating in a shared responsibility model for cloud-based environments. REs need to reduce the con-

centration risk on outsourced agencies."It has been observed that single third party vendors are providing services to multiple REs, which create concentration risk... If any cyber attack happens at such organisations, the same could have a systemic implication due to high concentration risk. Thus, there is a need for identification of such organisations and prescribing specific cyber security controls, including audit of their systems and protocols from independent auditors, to mitigate such concentration risk," said Sebi.

FPI flows don't impact markets: Sebi ED

FE BUREAU

Mumbai, February 22

PORTFOLIO FOREIGN INVESTORS (FPIs) have no impact on the markets, according to VS Sundaresan, executive director of Sebi. Strong domestic inflows are now supporting the indices, he said.

Speaking at Assocham's capital markets summit — The Re-set of Globalisation: Capi-

tal Formation@2047 for New India, Sundaresan said: "Ten years back, Indian markets were completely driven by FPI flows. There was a saying -'When FPIs sneeze, Indian markets get a cold.' But, today, nobody bothers whether they are putting in or withdrawing money." He added that FPI data are "only for publishing in the newspapers" with no relevance to the markets.

Sundaresan said this shows good capital formation, as savings potential of domestic investors is being channelised into the capital markets. He pointed out that in addition to institutional investors via mutual funds, pension funds and the insurance sector, direct retail participation is also a significant contributor.

He credited Indian market participants for not reacting to

every small event, which has ensured volatility in Indian markets is "optimum", and comparatively low vis-à-vis other markets. He added that India has strong investor protection mechanisms, which have catalysed retail participation in the markets.

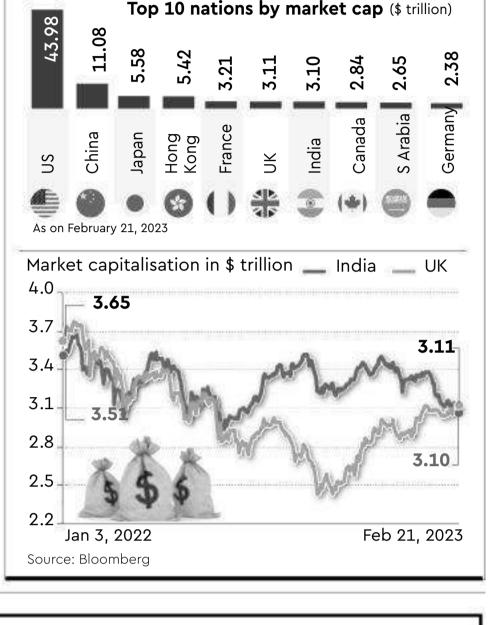

He added that pioneering efforts by the regulator have kept India at the forefront of reforms.

UK overtakes India as world's sixth-biggest equity market

THE UK HAS **SURPASSED** India as the world's sixth-

largest equity market for the first time in almost nine months as a weaker pound boosted the appeal of heavyweight exporters trading in London, and Adani Group-led jitters weighed on stocks in India. The combined mcap of primary listings in the UK, excluding ETFs and ADRs, reached about \$3.11 trillion on Tuesday, some \$5.1 billion higher than their

Indian equivalents, according to Bloomberg data. The UK's FTSE 350 index which comprises stocks in the FTSE 100 and the domestically focused FTSE 250 has gained 5.9% so far this year, outpacing a 4.7% increase in the MSCI All-Country World index. Indian markets, on the other hand, are grappling with a weaker rupee as well as the fallout of a rout in share prices of the companies in the Adani Group.

Sebi asks regulated entities to beef up cyber measures

FE BUREAU Mumbai, February 22

THE SECURITIES AND Exchange Board of India (Sebi) on Wednesday laid down a number of measures for its regulated entities (REs) to mitigate the cybersecurity threat

to the securities market. REs have been advised to define roles and responsibilities of chief information security officer (CISO) and other senior personnel and proactively monitor the cyberspace to identify phishing websites.

"The majority of the infections are primarily introduced via phishing emails, malicious adverts on websites and third party apps and programmes. Hence, thoughtfully designed security awareness campaigns that stress the avoidance of clicking on links and attachments in email can establish an essential pillar of defence,"

the regulator said.

Vulnerability assessment and penetration testing (VAPT) of the application should be conducted on a regular basis and all operating systems and applications should be updated with the latest patches. A strong log retention and

password policy should be implemented. Multi-factor authentication should be enabled for all users that connect using online or internet facility, and particularly for virtual private networks, web mail and accounts that access critical systems. The maker and checker framework should be implemented in a strict manner and MFA should be enabled for all user accounts, especially for those accessing critical applications, Sebi said.

Other cyber security measures advocated include deploying web and email filters

on the network, scanning emails, attachments and downloads on the host and mail gateway with a reputable antivirus solution, blocking malicious domains/IPs after diligently verifying them and restricting execution of "powershell" and "wscript" in enterprise environment, if not required.

To enhance security of cloud services, registered entities need to check public accessibility of all cloud instances in use, ensure proper security of cloud access tokens, imple-

ment appropriate security measures for testing, staging and backup environments hosted on cloud and consider employing hybrid data security tools that focus on operating in a shared responsibility model for cloud-based environments. REs need to reduce the con-

centration risk on outsourced

agencies."It has been observed that single third party vendors are providing services to multiple REs, which create concentration risk... If any cyber attack happens at such organisations, the same could have a systemic implication due to high concentration risk. Thus, there is a need for identification of such organisations and prescribing specific cyber security controls, including audit of their systems and protocols from independent auditors, to mitigate such concentration risk," said Sebi.

SURPASSED India as

the world's sixthlargest equity market for the first time in almost nine months as a weaker pound boosted the appeal of heavyweight exporters trading in London, and Adani Group-led jitters weighed on stocks in India. The combined mcap of primary listings in the UK, excluding ETFs and ADRs, reached about \$3.11 trillion on Tuesday, some \$5.1 billion higher than their according to **Bloomberg** data. The UK's FTSE 350 index which comprises stocks in the FTSE 100 and the domestically focused FTSE 250 has gained 5.9% so far this year, outpacing a 4.7% increase in the MSCI All-Country World index. Indian markets, on the other hand, are grappling with a weaker rupee as well as the fallout of a rout in share prices of the companies in the Adani Group.

Sebi asks regulated entities to beef up cyber measures

FE BUREAU Mumbai, February 22

THE SECURITIES AND Exchange Board of India (Sebi) on Wednesday laid down a number of measures for its regulated entities (REs) to mitigate the cybersecurity threat

to the securities market. REs have been advised to define roles and responsibilities of chief information security officer (CISO) and other senior personnel and proactively monitor the cyberspace to identify phishing websites.

"The majority of the infections are primarily introduced via phishing emails, malicious adverts on websites and third party apps and programmes. Hence, thoughtfully designed security awareness campaigns that stress the avoidance of clicking on links and attachments in email can establish an essential pillar of defence,"

the regulator said.

Vulnerability assessment and penetration testing (VAPT) of the application should be conducted on a regular basis and all operating systems and applications should be updated with the latest patches. A strong log retention and

password policy should be implemented. Multi-factor authentication should be enabled for all users that connect using online or internet facility, and particularly for virtual private networks, web mail and accounts that access critical systems. The maker and checker framework should be implemented in a strict manner and MFA should be enabled for all user accounts, especially for those accessing critical applications, Sebi said.

Other cyber security measures advocated include deploying web and email filters

on the network, scanning emails, attachments and downloads on the host and mail gateway with a reputable antivirus solution, blocking malicious domains/IPs after diligently verifying them and restricting execution of "powershell" and "wscript" in enterprise environment, if not required.

To enhance security of cloud services, registered entities need to check public accessibility of all cloud instances in use, ensure proper security of cloud access tokens, imple-

ment appropriate security measures for testing, staging and backup environments hosted on cloud and consider employing hybrid data security tools that focus on operating in a shared responsibility model for cloud-based environments. REs need to reduce the con-

centration risk on outsourced agencies."It has been observed that single third party vendors are providing services to multiple REs, which create concentration risk... If any cyber attack happens at such organisations, the same could have a systemic implication due to high concentration risk. Thus, there is a need for identification of such organisations and prescribing specific cyber security controls, including audit of their systems and protocols from independent auditors, to mitigate such concentration risk," said Sebi.

UK overtakes India as world's sixth-biggest equity market

THE UK HAS **SURPASSED** India as

the world's sixthlargest equity market for the first time in almost nine months as a weaker pound boosted the appeal of heavyweight exporters trading in London, and Adani Group-led jitters weighed on stocks in India. The combined mcap of primary listings in the UK, excluding ETFs and ADRs, reached about \$3.11 trillion on Tuesday, some \$5.1 billion higher than their

FPI flows don't impact markets: Sebi ED

FE BUREAU

Mumbai, February 22

PORTFOLIO FOREIGN INVESTORS (FPIs) have no impact on the markets, according to VS Sundaresan, executive director of Sebi. Strong domestic inflows are now supporting the indices, he said.

Speaking at Assocham's capital markets summit — The Re-set of Globalisation: Capi-

tal Formation@2047 for New India, Sundaresan said: "Ten years back, Indian markets were completely driven by FPI flows. There was a saying -'When FPIs sneeze, Indian markets get a cold.' But, today, nobody bothers whether they are putting in or withdrawing money." He added that FPI data are "only for publishing in the newspapers" with no relevance to the markets.

Sundaresan said this shows good capital formation, as savings potential of domestic investors is being channelised into the capital markets. He pointed out that in addition to institutional investors via mutual funds, pension funds and the insurance sector, direct retail participation is also a significant contributor.

He credited Indian market participants for not reacting to

every small event, which has ensured volatility in Indian markets is "optimum", and comparatively low vis-à-vis other markets. He added that India has strong investor protection mechanisms, which have catalysed retail participation in the markets.

He added that pioneering efforts by the regulator have kept India at the forefront of reforms.

WazirX shuts down NFT marketplace

SIDHARTHA SHUKLA February 22

INDIAN CRYPTO EXCHANGE WazirX has shuttered its marketplace for non-fungible tokens (NFT), according to a notice on its website on Tuesday. "The WazirX NFT marketplace has been sunset," the notice read."You can still trade

your NFTs on OpenSea." The NFT marketplace was launched in June 2021.

WazirX was India's largest crypto exchange until last year when the government introduced a new tax on crypto transactions, leading volumes to dry up on the platform and its rivals.

The combination of a hostile tax regime and a downturn

in crypto markets proved to be a double-whammy for India's crypto exchanges. WazirX laid off 40% of its workforce in October last year.

WazirX has been embroiled in a dispute with Binance over the ownership of the exchange. Binance announced the acquisition in a blog post in November 2019, and then clarified last August that the deal was limited to an agreement to buy certain assets and intellectual property of WazirX.The clarification came after India's anti-money laundering agency froze some WazirX assets.

Earlier this month, Binance cut off the operations services it was providing to WazirX.

SIDBI forays into venture debt market

FE BUREAU Mumbai, February 22

SMALL INDUSTRIES DEVEL-**OPMENT** Bank of India (SIDBI) has made its foray into the venture debt market to address funding needs of companies.

"Along with equity investments, we are talking about the ability to provide debt. A lot of banks, even today, are not in a position within their straitjacket to provide debt to companies. So, SIDBI has gone into

what is known as venture debt,"chairman and managing director Sivasubramanian Ramann said at the IVCA conclave in Mumbai.

"It is a very small beginning, but I think we've done about four investments, and this we are doing with, in fact, the partnership that has grown among all of you. We've partnered with a few of the funds that we've supported and we've been able to get leads from those funds."

WazirX shuts down NFT marketplace

SIDHARTHA SHUKLA February 22

INDIAN CRYPTO EXCHANGE WazirX has shuttered its marketplace for non-fungible tokens (NFT), according to a notice on its website on Tuesday. "The WazirX NFT marketplace has been sunset," the notice read. "You can still trade your NFTs on OpenSea."

The NFT marketplace was launched in June 2021.

WazirX was India's largest crypto exchange until last year when the government introduced a new tax on crypto transactions, leading volumes to dry up on the platform and its rivals.

The combination of a hostile tax regime and a downturn

in crypto markets proved to be a double-whammy for India's crypto exchanges. WazirX laid off 40% of its workforce in October last year. WazirX has been embroiled

in a dispute with Binance over the ownership of the exchange. Binance announced the acquisition in a blog post in November 2019, and then clarified last August that the deal was limited to an agreement to buy certain assets and intellectual property of WazirX.The clarification came after India's anti-money laundering agency froze some WazirX assets.

Earlier this month, Binance cut off the operations services it was providing to WazirX.

SIDBI forays into venture debt market

FE BUREAU Mumbai, February 22

SMALL INDUSTRIES DEVEL-**OPMENT** Bank of India (SIDBI) has made its foray into the venture debt market to address

funding needs of companies.

"Along with equity investments, we are talking about the ability to provide debt. A lot of banks, even today, are not in a position within their straitjacket to provide debt to companies. So, SIDBI has gone into

what is known as venture debt,"chairman and managing director Sivasubramanian Ramann said at the IVCA conclave in Mumbai.

"It is a very small beginning, but I think we've done about four investments, and this we are doing with, in fact, the partnership that has grown among all of you. We've partnered with a few of the funds that we've supported and we've been able to get leads from those funds."

Sebi asks regulated entities to beef up cyber measures

FE BUREAU Mumbai, February 22

THE SECURITIES AND Exchange Board of India (Sebi) on Wednesday laid down a number of measures for its regulated entities (REs) to mitigate the cybersecurity threat to the securities market.

REs have been advised to define roles and responsibilities of chief information security officer (CISO) and other senior personnel and proactively monitor the cyberspace to identify phishing websites.

"The majority of the infections are primarily introduced via phishing emails, malicious adverts on websites and third party apps and programmes. Hence, thoughtfully designed security awareness campaigns that stress the avoidance of clicking on links and attachments in email can establish an essential pillar of defence,"

the regulator said.

Vulnerability assessment and penetration testing (VAPT) of the application should be conducted on a regular basis and all operating systems and applications should be updated with the latest patches. A strong log retention and

password policy should be implemented. Multi-factor authentication should be enabled for all users that connect using online or internet facility, and particularly for virtual private networks, web mail and accounts that access critical systems. The maker and checker framework should be implemented in a strict manner and MFA should be enabled for all user accounts, especially for those accessing critical applications, Sebi said.

Other cyber security measures advocated include deploying web and email filters

on the network, scanning emails, attachments and downloads on the host and mail gateway with a reputable antivirus solution, blocking malicious domains/IPs after diligently verifying them and restricting execution of "powershell" and "wscript" in enterprise environment, if not required.

To enhance security of cloud services, registered entities need to check public accessibility of all cloud instances in use, ensure proper security of cloud access tokens, imple-

ment appropriate security measures for testing, staging ronments.

agencies."It has been observed that single third party vendors are providing services to multiple REs, which create concentration risk... If any cyber attack happens at such organisations, the same could have a systemic implication due to high conorganisations and prescribing trols, including audit of their independent auditors, to mitigate such concentration risk," said Sebi.

REs need to reduce the concentration risk on outsourced

and backup environments hosted on cloud and consider employing hybrid data security tools that focus on operating in a shared responsibility model for cloud-based envi-

centration risk. Thus, there is a need for identification of such specific cyber security consystems and protocols from

FPI flows don't impact markets: Sebi ED

FE BUREAU Mumbai, February 22

PORTFOLIO FOREIGN INVESTORS (FPIs) have no impact on the markets, according to VS Sundaresan, executive director of Sebi. Strong domestic inflows are now supporting the indices, he said.

Speaking at Assocham's capital markets summit — The Re-set of Globalisation: Capi-

tal Formation@2047 for New India, Sundaresan said: "Ten years back, Indian markets were completely driven by FPI flows. There was a saying -'When FPIs sneeze, Indian markets get a cold.' But, today, nobody bothers whether they are putting in or withdrawing money." He added that FPI data are "only for publishing in the newspapers" with no relevance to the markets.

Sundaresan said this shows good capital formation, as savings potential of domestic investors is being channelised into the capital markets. He pointed out that in addition to institutional investors via mutual funds, pension funds and the insurance sector, direct retail participation is also a significant contributor.

He credited Indian market participants for not reacting to

every small event, which has ensured volatility in Indian markets is "optimum", and comparatively low vis-à-vis other markets. He added that India has strong investor protection mechanisms, which have catalysed retail participation in the markets.

He added that pioneering efforts by the regulator have kept India at the forefront of reforms.

UK overtakes India as world's sixth-biggest equity market

THE UK HAS **SURPASSED** India as

the world's sixthlargest equity market for the first time in almost nine months as a weaker pound boosted the appeal of heavyweight exporters trading in London, and Adani Group-led jitters weighed on stocks in India. The combined mcap of primary listings in the UK, excluding ETFs and ADRs, reached about \$3.11 trillion on Tuesday, some \$5.1

billion higher than their

Indian equivalents, according to **Bloomberg** data. The UK's FTSE 350 index which comprises stocks in the FTSE 100 and the domestically focused FTSE 250 has gained 5.9% so far this year, outpacing a 4.7% increase in the MSCI All-Country World index. Indian markets, on the other hand, are grappling with a weaker rupee as well as the fallout of a rout in share prices of the companies in the Adani Group.

WazirX shuts down NFT marketplace

SIDHARTHA SHUKLA February 22

INDIAN CRYPTO EXCHANGE WazirX has shuttered its marketplace for non-fungible tokens (NFT), according to a notice on its website on Tuesday. "The WazirX NFT marketplace has been sunset," the notice read. "You can still trade your NFTs on OpenSea."

The NFT marketplace was launched in June 2021.

WazirX was India's largest crypto exchange until last year when the government introduced a new tax on crypto transactions, leading volumes to dry up on the platform and its rivals.

Sebi asks regulated entities to beef up cyber measures

FE BUREAU Mumbai, February 22

THE SECURITIES AND Exchange Board of India (Sebi) on Wednesday laid down a number of measures for its regulated entities (REs) to mitigate the cybersecurity threat to the securities market.

REs have been advised to define roles and responsibilities of chief information security officer (CISO) and other senior personnel and proactively monitor the cyberspace to identify phishing websites.

"The majority of the infections are primarily introduced via phishing emails, malicious adverts on websites and third party apps and programmes. Hence, thoughtfully designed security awareness campaigns that stress the avoidance of clicking on links and attachments in email can establish an essential pillar of defence,"

the regulator said.

Vulnerability assessment and penetration testing (VAPT) of the application should be conducted on a regular basis and all operating systems and applications should be updated with the latest patches. A strong log retention and

password policy should be implemented. Multi-factor authentication should be enabled for all users that connect using online or internet facility, and particularly for virtual private networks, web mail and accounts that access critical systems. The maker and checker framework should be implemented in a strict manner and MFA should be enabled for all user accounts, especially for those accessing critical applications, Sebi said.

Other cyber security measures advocated include deploying web and email filters

on the network, scanning emails, attachments and downloads on the host and mail gateway with a reputable antivirus solution, blocking malicious domains/IPs after diligently verifying them and restricting execution of "powershell" and "wscript" in enterprise environment, if not required.

To enhance security of cloud services, registered entities need to check public accessibility of all cloud instances in use, ensure proper security of cloud access tokens, imple-

ment appropriate security measures for testing, staging and backup environments hosted on cloud and consider employing hybrid data security tools that focus on operating in a shared responsibility model for cloud-based environments. REs need to reduce the con-

centration risk on outsourced agencies."It has been observed that single third party vendors are providing services to multiple REs, which create concentration risk... If any cyber attack happens at such organisations, the same could have a systemic implication due to high concentration risk. Thus, there is a need for identification of such organisations and prescribing specific cyber security controls, including audit of their systems and protocols from independent auditors, to mitigate such concentration risk," said Sebi.

UK overtakes India as world's sixth-biggest equity market

THE UK HAS **SURPASSED** India as

the world's sixthlargest equity market for the first time in almost nine months as a weaker pound boosted the appeal of heavyweight exporters trading in London, and Adani Group-led jitters weighed on stocks in India. The combined mcap of primary listings in the UK, excluding ETFs and ADRs, reached about \$3.11 trillion on Tuesday, some \$5.1 billion higher than their

Indian equivalents, according to **Bloomberg** data. The UK's FTSE 350 index which comprises stocks in the FTSE 100 and the domestically focused FTSE 250 has gained 5.9% so far this year, outpacing a 4.7% increase in the MSCI All-Country World index. Indian markets, on the other hand, are grappling with a weaker rupee as well as the fallout of a rout in share prices of

the companies in the

FPI flows don't impact markets: Sebi ED

FE BUREAU Mumbai, February 22

PORTFOLIO FOREIGN INVESTORS (FPIs) have no impact on the markets, according to VS Sundaresan, executive director of Sebi. Strong domestic inflows are now sup-

Speaking at Assocham's capital markets summit — The Re-set of Globalisation: Capi-

tal Formation@2047 for New India, Sundaresan said: "Ten years back, Indian markets were completely driven by FPI flows. There was a saying -'When FPIs sneeze, Indian markets get a cold.' But, today, nobody bothers whether they are putting in or withdrawing money." He added that FPI data are "only for publishing in the newspapers" with no relevance to the markets.

Sundaresan said this shows good capital formation, as savings potential of domestic investors is being channelised into the capital markets. He pointed out that in addition to institutional investors via mutual funds, pension funds and the insurance sector, direct retail participation is also a significant contributor.

He credited Indian market participants for not reacting to

every small event, which has ensured volatility in Indian markets is "optimum", and comparatively low vis-à-vis other markets. He added that India has strong investor protection mechanisms, which have catalysed retail participation in the markets.

He added that pioneering efforts by the regulator have kept India at the forefront of reforms.

Sebi asks regulated entities to beef up cyber measures

FE BUREAU Mumbai, February 22

THE SECURITIES AND Exchange Board of India (Sebi) on Wednesday laid down a number of measures for its regulated entities (REs) to mitigate the cybersecurity threat to the securities market.

REs have been advised to define roles and responsibilities of chief information security officer (CISO) and other senior personnel and proactively monitor the cyberspace to identify phishing websites.

"The majority of the infections are primarily introduced via phishing emails, malicious adverts on websites and third party apps and programmes. Hence, thoughtfully designed security awareness campaigns that stress the avoidance of clicking on links and attachments in email can establish an essential pillar of defence,"

the regulator said.

Vulnerability assessment and penetration testing (VAPT) of the application should be conducted on a regular basis and all operating systems and applications should be updated with the latest patches. A strong log retention and

password policy should be

implemented. Multi-factor authentication should be enabled for all users that connect using online or internet facility, and particularly for virtual private networks, web mail and accounts that access critical systems. The maker and checker framework should be implemented in a strict manner and MFA should be enabled for all user accounts, especially for those accessing critical applications, Sebi said.

Other cyber security measures advocated include deploying web and email filters

on the network, scanning emails, attachments and downloads on the host and mail gateway with a reputable antivirus solution, blocking malicious domains/IPs after diligently verifying them and restricting execution of "powershell" and "wscript" in enterprise environment, if not required.

To enhance security of cloud services, registered entities need to check public accessibility of all cloud instances in use, ensure proper security of cloud access tokens, imple-

ment appropriate security measures for testing, staging and backup environments hosted on cloud and consider employing hybrid data security tools that focus on operating in a shared responsibility model for cloud-based environments. REs need to reduce the con-

agencies."It has been observed that single third party vendors are providing services to multiple REs, which create concentration risk...If any cyber attack happens at such organisations, the same could have a systemic implication due to high concentration risk. Thus, there is a need for identification of such organisations and prescribing specific cyber security controls, including audit of their systems and protocols from independent auditors, to mitigate such concentration risk," said Sebi.

SIDBI forays into venture debt market

FE BUREAU Mumbai, February 22

SMALL INDUSTRIES DEVEL-OPMENT Bank of India (SIDBI) has made its foray into the venture debt market to address

funding needs of companies.

"Along with equity investments, we are talking about the ability to provide debt. A lot of banks, even today, are not in a position within their straitjacket to provide debt to companies. So, SIDBI has gone into

what is known as venture debt," chairman and managing director Sivasubramanian Ramann said at the IVCA conclave in Mumbai.

"It is a very small beginning, but I think we've done about four investments, and this we are doing with, in fact, the partnership that has grown among all of you. We've partnered with a few of the funds that we've supported and we've been able to get leads from those funds."
