UHURU CARE INSTRUCTIONS

Do:

- Wipe down all surfaces as part of your regular cleaning schedule using a clean white, damp (water only) rag and follow with a dry rag remove any excess moisture.
- Wipe up light spills immediately in order to avoid staining the wood. We recommend the use of coasters if glasses placed on the table top are likely to become wet with condensation (as they might in the summertime). Clean spills using a soft cloth dampened with clean water then dry immediately.
- Wipe up heavier spills, like grease or oil, with a solution of mild soap and water. The surface should be rinsed immediately with a clean, damp cloth and dried thoroughly.
- Keep the relative humidity of the room between 35% and 55%. Controlling relative humidity and temperature is important to the long-term life of fine wood furniture. If an atmospheric change is too drastic, or humidity and temperature levels too extreme one way or the other, your furniture can be damaged.
- Protect your piece from direct sunlight. Unfiltered ultraviolet (UV) rays will discolor and damage wood and finishes.
- Avoid exposing the furniture finish to items creating extreme heat, cold or moisture. Use protective padding under these items.
