CONTRACT SOLUTIONS

WHITE LABEL

Mass customized furniture solutions to market at scale.
Uhuru Design combines Smithsonian pedigree and a
vertically integrated global supply chain to power the
furniture ambitions of global clients with label partnerships.

UHURUDESIGN.COM

PRODUCT DESIGN

We develop custom and OEM furniture designs for mission driven brands across a range of industries - from hotels, workplace, retail, museums, and more. With over fifteen years of experience in concept development, prototyping, and production, our process is informed by a brand's larger design vision. This allows us to build products and brand-specific packages with the expertise of our 60+ person team of industrial designers, design engineers, project managers, wood and metal workers, and logistics specialists.

We have worked with primary players in commercial real estate, co-working, co-living, brick & mortar, and marketplace platforms in order to power global footprints and stand alone furniture lines.

CAPABILITIES

- Design and Prototype > Zero to one, concept to prototype, in a matter of weeks.
- International Supply Chain > Custom production meets domestic and international capacity on a competitive landed cost basis.
- Private Label Runs > When scaling down the road, Uhuru develops, stocks, and ships smaller SKU base portfolios across disruption channels with preferred clients.
- Uhuru Standard Product Customization > Tailored off-the-shelf stock and designs.

CUSTOM MANUFACTURING

As a vertically integrated manufacturer, we design with the entire supply chain in mind. Our different manufacturing arms allow us to efficiently allocate work based on timing, volume, and material origins.

Built in America's furniture manufacturing heartland, our 50,000 sq. foot Pennsylvania factory is housed in a renovated shoe factory built 120 years ago. Our team consists of more than 30 metal and wood craftsmen, capable of producing low and higher volumes of standard and custom furniture.

Our international manufacturing division has limitless production capabilities and lives up to Uhuru's exceptional standards. Our facilities in Asia (Vietnam) are home to some of the most socially innovative and environmentally sustainable manufacturing in the region.
