Technical Specification

Royston Glass Textured Glass Splashbacks are available in dimensions up to 3000mm x 1250mm. We are able to produce splashbacks in excess of these dimensions but such orders may be subject to over-size additional charges and extended manufacturing lead times.

All our Textured Glass Splashbacks are manufactured in 6mm thick glass as standard; however 10mm thick glass is also available on request.

Our unique Textured Glass Splashbacks are particularly enhanced by metallic colours, which bring them to life, highlighting the striking variation in texture present in each unique design.

We manufacture to your own specification in virtually any colour imaginable. Not only can you choose from any available RAL, NCS or British Standard paint colour, but we are also pleased to offer a full colour match service enabling our customers to achieve a complete bespoke design, providing colour matches to the majority of high street paint brands. Where we perform a bespoke colour match, Royston Glass will always supply a sample for approval.

- 6mm toughened glass to British Standard

- Heat resistant

- Shaping and cut out facility

- Adhesive Fixing

- Limitless colour options

- Colour Match Service

- Hygienic and easy to clean

- In house manufacture with speedy delivery

- Samples Available on Request (£25.00 Incl. VAT, each)

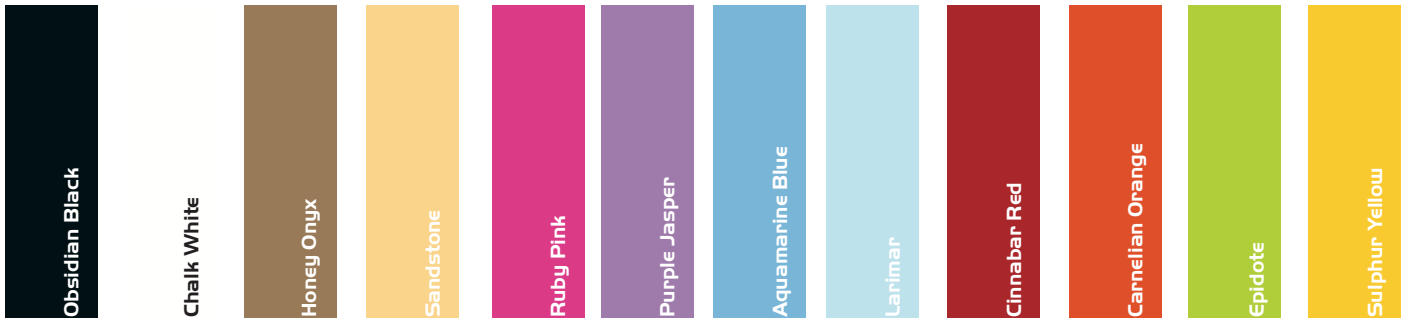

Please note that the sample tiles reflect light in a different manner to a larger piece of glass, which may result in a different colour tone when compared to a larger splashback.
