IHO-INITIAL HYBRID OFFERING TERMS

YGB HYBRID CURRENCY

YGB Initial Hybrid Offering: **YGB HYBRID “DIGITAL” CURRENCY**

2018

“You cannot treat us like everybody else...because we are not like everybody else.”

IHO Introduction

As international gold miners, we offer a practical approach to the currency industry, from our very own creation titled “YGB Hybrid Currency,” a direct rival to the entire Digital Currency Industry. Our Hybrid challenges the Digital Currency industry as a whole. We make this offering through our own creation known as the Initial Hybrid Offering (IHO)

We derived the Hybrid by using:

- our superior mining capabilities,
- new development in modern technology, specifically in digital currency industry,
- expanding two decades of fantastic relationship building with generations of Small-Scale Miners,
- our own chairman’s influence as a bestowed Paramount Chief in West Africa,
- our chairman’s keen relations throughout South American governments,
- our tribal bonds and family orientation with the Traditional Governments,
- our understanding and solid friendships and contractual agreements with Central Governments and Central Banking systems, especially those in middle management surviving each regime change, all these things add value to our Hybrid Currency.

These bonds, friendships, and relations have created a brand name to the world as well as years on the ground created a great understanding of the culture, the traditions and most importantly, the people and their needs.

The YGB Hybrid Digital Currency:

- does NOT rely on any outside blockchain technology, but we are building our own technology known as the “Hybridchain.”
- does NOT depend on any exchanges or platforms, we will not trade our physical asset (i.e. gold, silver...) for other digital codes, no matter their value, but we are creating our own exchanges and platforms strictly for similar technologies to our hybrid.
- does NOT bond with or have relations with any other technology or cryptocurrency, as we see our system as a true hybrid affixing 24 karat gold to digital technology. No other system in the world extracts their own gold and precious minerals from the earth through ACTUAL MINERAL MINING.

When was the last time you saw any evidence that a digital currency was making efforts to build a blockchain supportive of the market women in the bush of Liberia with the executive businessman in New York? It is not about giving away coins, tokens, applications, and smart contracts. Any crypto can do that. Add a few numbers, alphabets, symbols, or characters to the encryption and you get more digital codes to give away as free tokens or coins. Does that create value outside marketing and lying to users, likely not. For us it is about adding value to one’s family and building wealth for generations to come. We feel that a true asset needs to be valuable without hype, and

marketing gimmicks. It needs to be money that the entire world feels comfortable spending and accepting with or without a blockchain.

We make no claims that we have the best or the right approach. We are focused on using our superior skills and all our relationships to expand a new era of currency we created known, as a Hybrid Currency. Our Hybrid naturally has no competition but considered a superior currency because it permanently affixes the most trusted currency in the world, gold, plus a new era of technology from digital currency known as cryptocurrency, creating what we titled YGB HYBRID DIGITAL CURRENCY. Most cryptos that stand alone had struggled to gain significant involvement from citizens around the world. Everyone points out that traditional cryptos have no backbone, no substance, no true value without something simple like gold or silver. Many of them make attempts to add gold and silver by saying, “we are backed by,” or “we have a relationship with,” “we use gold as collateral for.” This is likely true, but all this talk is just talk. Backed by, relationships with, or collateral for, do not do a damn thing for you as the user.

You can buy gold at world market price anywhere, you do not need their blockchain for that. OUR HYBRID SYSTEM ENSURES THAT YOU OWN THE PHYSICAL GOLD DIRECTLY FROM THE GROUND FROM THE DAY YOU SIGNED UP. Our gold is free from all middlemen, free exchanges and their fees, free from governments, free from any brokers or resellers markups, free from any outsiders. Anyone making claims that they can do the same thing, but they are not doing the mining themselves, ask them to show you the gold in your account and then cash it in, they will have a story why you cannot.

Our hybrid’s approach is not like any other currency or digital currency. It is not possible to see our hybrid the way you see others. The progress with their currency is similar to gambling. In their currency, the price only goes up and down because someone else wants to sell or willing to buy at a higher or lower price. It is not based against any natural use. A computer basically completes a check list of equations and then you have a currency.

The needs of the country’s citizens are NOT taken into consideration. There is NO central or federal government to help roll it out. There is NO respected global currency affixed to it to ensure its longevity. Most of the digital currencies are not even claiming to have collateral or backing just their codes. The collateral process has been proven to be weak because it lends itself to discrimination practices and biases. The backed by process is just a term loosely used with no true evidence of what’s backing the asset. Backed by is the strongest way to admit a weakness of, “It is not really my asset or I really don’t have an asset.”

Facts That Support Our YGB Hybrid Currency

- We are actual gold miners with our goldfields and the strongest relationships with the world’s largest mining group, the small scale miners.

-
- We mine our our gold 100% free from all middlemen.
 - The holder of our hybrid currency holds an affixed product giving them 100% ownership for the digital asset and the physical asset.
 - Our gold straight from the ground holds more economic stability, because it can not be devalued like other currencies.
 - Any currency without gold or silver affixation is not a currency in a real sense, because it does not have intrinsic value, and can be devalued at any given time for various reasons.
 - Sometimes the price of gold or silver may fluctuate in the market but we still have that margin because ours is affixed with gold that we extracted and provided to our users and proved to be below the world market price.
 - Gold and silver are the only products in the world trusted by every nation including all nations in the United Nations.

A true hybrid, as described in section 1.0. (Understanding YGB IHO-Initial Hybrid Offering), bases its strength on the everyday citizen. It gives power and wealth to the actual person. It has superior laws that protects its integrity against the openness of decentralized systems and the limitations of centralized system. We say this with great truths that no decentralized or centralized currency in the form of fiat or digital is affixed using our hybrid laws. Many make claims of collateral or backing but not affixed. Affixed means its yours, you own both the physical and digital asset.

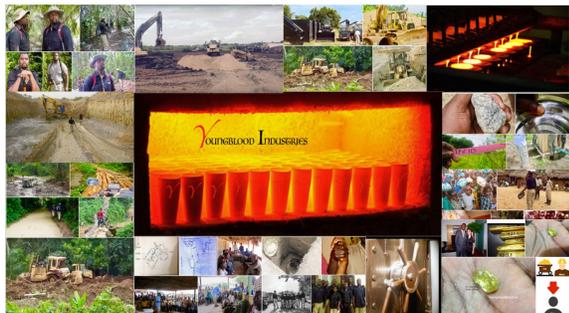

This offering is through our IHO - Initial Hybrid Offering. Our YGB Hybrid Currency known as the YGB Hybrid Digital Currency, a subset to the YGB Hybrid Currency, will only be placed in our own Exchanges and Platforms.

We only ask that you read the terms of our Initial Hybrid Offering to fully understand and agree to our approach, the risk, and the rewards. We are the first people to find the gold and silver and other minerals! We are the first people to own the gold and silver and other minerals including 100% of its original value! We mine (extract minerals) from our own goldfields, and operate production mines. We feel all of these positive points put us in a category all to ourselves. Our approach to this entire process is WE ARE MINERS FIRST. All currencies need a physical asset, and gold and silver are the only two currencies on planet earth supported by every government and citizen of the world. If you are willing to be involved in the era of hybrid currency with actual gold and minerals extractors, join us at www.YOUNGBLOODINDUSTRIES.com.

You Have to Treat Us Differently

If other companies can actually guarantee you 100% that you will receive 24 karat gold below market price and assure you 100% that it will be affixed to each coin, token, smart contract, or application, they would have done it. We have made many cryptos change their language. This is not us being cocky, we are

just miners, we are just good at what we do. We have been mining minerals for decades in and out of some jungle, desert, or forest. We are very good at finding the minerals and extracting the minerals through the most hostile situations and harshest environments. We are very much aware of the thousands of companies out there saying they are a hybrid or offering similar services. In reality they are just another group of resellers or middlemen peddling other people's gold, silver, etc.

We are aware that some are big, some are small, some are fake, and some are worthy. Our focus is our ability to find precious minerals and rare earth elements and add their value to our hybrid currency. We are not concerned about what those companies are doing the same way that they never cared about our activities as a mining company or

any small-scale miners. We understand they use our mining terminology when searching (digital mining) for their binary codes of coins, tokens, smart contracts, application, etc. That's their prerogative! Our job is to focus on what we do and what we do is to find and extract gold, silver, platinum, diamonds, etc. So, we figure, if all those other companies could

do what we do, they would have done it. Our product is about 24 karat gold being 100% affixed (owned by you) straight from the mining site, free from any middleman, broker or trader. We do not have to offer our gold through other people's formats, we do not have to use our gold to be backed by, we own our gold fresh from the earth. Why are they all now trying to make claims they have the same access to gold as we do? If they can do what we are doing they would have done it from the beginning.

1.0. Understanding YGB IHO-Initial Hybrid Offering

This document explains terms, conditions, and obligations for participation in YGB Hybrid Digital Currency to completely build out its Hybridchain Exchange(s) and Platform(s) using the Precious Minerals and Rare Earth Elements we mine. Our *(Hybridchain Technology is similar to the blockchain technology **EXCEPT**, the Hybridchain permanently combines a valuable physical asset to other forms of assets).*

1.1. The Initial Hybrid Offering (IHO) is created to obtain original users to be the first of our groundbreaking one-of-a kind Hybridchain to build the funding for three types of Hybridchain Technology, a similar technology to the current Blockchain Technology. **Except**, a true Hybrid is based on affixing Value, Tangible/Physical Assets such as Gold, to other asset(s) forms. The Hybrid development, the marketing, the day-to-day use of the Hybrid platform(s) are already taking the world by storm. Early participants will gain a lifetime of benefits with better price, more gold, and royal treatment.

1.2. Understanding the terminology is very important: Backed Vs Affixed. Backed means it belongs to someone else. Affixed means it belongs to you. In a real world scenario, when you are offered a product or service and the word BACKED is used, you are under the impression that the investment is safe. Because the word backed means somewhere or somehow, if the investment takes a turn for the worse, whoever or whatever is backing up the investment will subsidize or protect your investment. THAT'S NOT WHAT BACKED MEANS IN AN INVESTMENT. You are confusing backed with collateral. Collateral means that something is offered to protect the investment. How many times have you actually seen the actual object(s) supposedly backing up the investment. AFFIXED, in the way we use the term, is a permanently attached valuable physical asset to another asset(s) form. In this case, we affixed our gold to a technology known as Digital Currency. When we say affixed we mean you actually own the gold. It is yours. We will be able to deliver it to your doorstep. You can hold it in your hand. It belongs to you 100% from the time you place your cash with us. You are so familiar with hearing the word backed by this, backed by that, you never stopped to ask yourself what is the true meaning of backed by...

1.3. Blockchain Technology Vs. Hybridchain Technology: A blockchain, is a continuously growing list of records, called blocks, which are linked and secured using cryptography. By design, the blockchain is a decentralized or centralized technology of a network of computers which uses blockchain technology to jointly manage the database that records transactions. A Hybridchain permanently affixes a valuable physical asset to any form of asset(s) such as cryptographic to be used as a medium of exchange through a distributed ledger or artificial intelligence, or a quantum system.

1.4. Digital Miners Vs. Miners: A digital miner is someone using a computer to search and complete a binary code (cryptographic) process to be used as a transaction, gaming, or some other transaction. A **Miner** a person who works in a mine digging for minerals. A miner digs tunnels, open pits, and dredging for minerals using heavy machinery, hand tools, explosives etc. to extract the minerals from-the-earth.

1.5. We created the YGB Hybrid Currency knowing it must be a permanent combination that affixes a valuable physical asset to any form of asset(s). The Hybrid Currency uses an asset(s) to add value to a weaker asset. Example: A real Hybrid Currency will permanently affix (combine) its valuable physical asset (i.e. gold) to any digital currency such as cryptographic used on a blockchain or as a medium of exchange (blockchain, artificial intelligence, or a quantum system) in or through a distributed ledger or affix its valuable asset to a fiat currency that is supported by a government to be used as money (i.e. paper tender, credit cards, bank notes, etc).

THE KEY TO A SAFE AND PURE HYBRID IS ITS LAWS.

1.6. Short Definition: YGB Hybrid Currency is a valuable physical asset permanently affixed to another form of asset(s).

2.0. IHO Conditions

Youngblood Industries will operate an Initial Hybrid Offering for the purpose of which is to raise funds to complete its Hybridchain Technology using YGB Hybrid Currency (i.e. Hybrid Dollars or Crypto Dollars and Hybrid Cents or Crypto Cents or Hybrid Currencies). This IHO works under the basis that Youngblood Industries has created a product and service known as YGB Hybrid Currency that affixes physical assets (i.e. gold, silver) including but not limited to precious minerals and rare earth elements and other natural resources to other forms of asset(s) including but not limited to virtual/digital currencies, fiat currencies, and other asset(s) with or without its own marketplace. Capital raised by this IHO will develop Youngblood Industries projects associated with the creation of the Hybridchain in co-operation with the partner companies or affiliates associated which assisted in developing the technology.

2.1. The IHO is ongoing until the first round of participants reaches 800,000 individuals with separate email and shipping addresses. One of the issues with current Digital Currencies is they count each email as a separate user, but one person can have five

different emails. We instead depend on identifying each person using emails and physical mailing address. This is based on the gold which must be shipped. Multiple emails will not be considered as separate users, a single participant is registered by physical address not including a post office box. Users will be asked to provide their physical address, but its expected that no address will be needed until a users is prepared to accept any physical metal.

2.2. Immediately following the IHO, YGB opens the Hybridchain, making available hybrid currency as hybrid/crypto dollars and hybrid/crypto cents to participants in the YGB Hybridchain.

2.3. YGB Hybrid Currency is Hybrid Dollar or Crypto Dollars and Hybrid Cent or Crypto Cents will be available on the YGB Exchanges and Platforms and Vendors that accept digital currency in the form of online transfers, card swipe, and app money transactions.

2.4. YGB will be available through the YGB-Wallet under the terms and conditions of YGB Hybrid Currency. Youngblood Industries may at any time in its own discretion decide to transfer storage of YGB to the Website or any other wallet or hybridchain.

2.5. The YGB White Paper and Strategy Plan will provide all details of the ideology, plan structure, and management strategy.

2.6. The number of YGB Crypto Dollars and Crypto Cents is based on our ability to extract precious minerals, rare earth elements, and other valuable resources. The IHO conditions are indicated in more detail in the White Paper and the Website which are an integral part of this document and you agree to be bound by them.

2.7. As a participant in this IHO, you agree to be bound by all the terms and conditions as set forth in the White Papers, IHO Offering, Privacy Policy, Terms of Use, Conditions of those of the Website. Any failure to follow the instructions may restrict you from participating.

12.0. Risks

12.1. As a mining company we work in hostile and harsh conditions and subject to the effects of politics, acts of God, wars, etc. You should peruse, comprehend and carefully consider or seek legal advice as to the risks described below in addition to the other information stated in this Agreement, the White Paper, Terms, the Website or elsewhere before deciding to participate in the IHO. Participating in the IHO will be deemed as you having accepted all the risks outlined in this Agreement.

12.2. YGB price may experience extreme volatility. Cryptographic technology have demonstrated extreme fluctuations in price over short periods of time on a regular basis. You must be prepared to accept similar fluctuations in YGB value. Such fluctuations are due to market forces and represent changes in the balance of supply and demand. Youngblood Industries or YGB cannot and does not guarantee any market liquidity for YGB. Additionally, due to different regulatory requirements in different jurisdictions, the liquidity of YGB may be markedly different in different jurisdictions.

12.3. While some of cryptographic technology may have been relatively stable, it is possible that their values may drop significantly in the future, which may deprive Youngblood Industries or YGB of sufficient resources to continue to operate.

12.4. Cryptographic technology are being, or may be, scrutinized by the regulatory authorities of various jurisdictions. YGB may receive queries, notices, warnings, requests or rulings from one or more regulatory authorities from time to time, or may even be ordered to suspend or discontinue any action in connection with YGB Currency, as well as be impacted by one or more regulatory inquiries or regulatory actions, which could impede or limit the ability of YGB Team to further conduct business. The

development, marketing, promotion or otherwise of Youngblood Industries may be seriously affected, hindered or terminated as a result.

12.5. Advances in cryptography, such as code cracking or technical advances such as the development of quantum computers, could present risks to all cryptographic technology, including YGB. This could result in the theft, loss, disappearance, destruction or devaluation of YGB. It is impossible to predict the future of cryptography or the future of security innovations to an extent that would permit Youngblood Industries accurately guide the development of YGB Currency to take into account such unforeseeable changes in the domains of cryptography or security.

12.6. Youngblood Industries cannot guarantee the software used by YGB or Youngblood Industries to be flaw-free. It may contain certain flaws, errors, defects, mistakes, and bugs, which may disable some functionality for users, expose users' information or otherwise. Such flaw would compromise the usability and/or security of YGB and consequently bring adverse impact on the value of YGB Currency.

12.7. Cryptographic technology mainly operate on open source project and supported by the community. Youngblood Industries does not lead the development, marketing, operation or otherwise of affiliate cryptographic technologies. Anybody may develop a patch or upgrade of the source code of YGB technologies or its technology source without prior authorization of anyone else. The acceptance of YGB patches or upgrades by a significant, but not overwhelming, percentage of the users could result in a "fork" in the Hybridchain of YGB, and consequently the operation of two separate networks and will remain separate until the forked Hybridchains are merged. The temporary or permanent existence of forked Hybridchains could adversely impact the operation and the market value of YGB Currency and in the worst-case scenario, could ruin the sustainability of YGB. While such a fork in the Hybridchain would possibly be resolved by community-led efforts to merge the forked Hybridchains, the success is not guaranteed and could take long period of time to achieve.

12.8. YGB technology and software used by Youngblood Industries or YGB Currency could be updated, amended, altered or modified from time-to-time by the developers

and/or the community of YGB. Nobody is able to foresee or guarantee the precise result of such update, amendment, alteration or modification. As a result, any update, amendment, alteration or modification could lead to an unexpected or unintended outcome that adversely affects YGB's operation or market value.

12.9. The Hybridchain rests on its own open technology source software. Regardless of Youngblood Industries or YGB efforts to keep the Hybridchain secure, anyone may intentionally or unintentionally introduce weaknesses or bugs or careless mistakes into the core infrastructural elements of the technology or system. This could consequently result in the loss of YGB Crypto Dollars or Crypto Cents or Currency held by you.

12.10. The loss or destruction of a private key required to access YGB may be irreversible. You are required to safeguard the private keys relating to your own YGB Wallets. To the extent such private key is lost, destroyed or otherwise compromised, neither Youngblood Industries, YGB nor anyone else will be able to access the related YGB Wallets.

12.11. YGB is not a currency issued by any one individual, central bank or national, supranational or quasi-national organization. The circulation and trading of YGB on the market depends on the consensus on its value between the relevant market participants. Nobody is obliged to redeem or purchase any YGB from any user or YGB holder. Nor does anyone guarantee the liquidity or market price of YGB to any extent. Youngblood Industries or YGB has no control over market price or liquidity of YGB once YGB start to trade in the open market.

12.12. It is possible that Youngblood Industries or YGB product and services will not be used by a large number of individuals, businesses and other organizations and that there will be limited public interest in the creation and development of its functionalities. Such a lack of interest could impact the development of Youngblood Industries and YGB business.

12.13. Youngblood Industries, as developed, may not meet your expectations. You acknowledge that YGB is currently under development and may undergo significant

changes before release. You also acknowledge that any expectations regarding the form and functionality of Youngblood Industries held by you may not be met upon its release for any number of reasons, including a change in the design and implementation plans and execution of the implementation of YGB. Furthermore, you acknowledge that Youngblood Industries projects such as YGB may never be fully completed or released.

12.14. You understand and accept that hackers or other groups or organizations may attempt to steal YGB or otherwise interrupt or cease business or usage of YGB.

12.15. Except for historical information, there may be matters in this Agreement, the Website, the White Paper or elsewhere that are forward-looking statements. Such statements are only predictions and are subject to inherent risks and uncertainty. Forward-looking statements, which are based on assumptions and estimates and describe Youngblood Industries and YGB future plans, strategies, and expectations are generally identifiable by the use of the words 'anticipate', 'will', 'believe', 'estimate', 'plan', 'expect', 'intend', 'seek', or similar expressions. You are cautioned not to place undue reliance on forward-looking statements. By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties both general and specific that contribute to the possibility those predictions, forecasts, projections and other forward-looking statements will not occur. Those risks and uncertainties include actors and risks specific to the industry in which Youngblood Industries and YGB operates as well as general economic conditions and prevailing exchange rates and interest rates. Actual performance or events may be materially different from those expressed or implied in those statements. All forward-looking statements attributable to Youngblood Industries or YGB or persons acting on behalf of Youngblood Industries or YGB are expressly qualified in their entirety by the cautionary statements in this section. Except as expressly required by the applicable law, Youngblood Industries or YGB undertakes no obligation to publicly update or revise any forward-looking statements provided in this publication whether as a result of new information, future events or otherwise, or the risks affecting this information. None of Youngblood Industries, YGB its officers or any person named in this Agreement, the Website, the White Paper or elsewhere with their consent, or any person involved in the preparation of this

Agreement, the Website or the White Paper, makes any representation or warranty (express or implied) as to the accuracy or likelihood of fulfillment of any forward-looking statement except to the extent required by law.

12.16. The World Wide Web industry is comprised of a number of participants and is subject to rapid change and competition Youngblood Industries or YGB faces from other organizations, some of which may have greater financial, technical and marketing resources. Increased competition could result in underutilization of employees, reduced operating margins and loss of market share. Any of these occurrences could adversely affect and effect the Youngblood Industries and YGB business models, operating results and financial condition. The possibility remains that the fundamental business model may not achieve any traction due to an existing or new entrant offering a similar solution or that the general public do not see it as part of their future. The targets and business valuation inherent in the Website, the White Paper or elsewhere are based on Youngblood Industries management personal experience, contacts and feedback from the market. There can be no assurance that these reflect the actual reality of the opportunity or that will be able to compete successfully against current or future competitors. You are encouraged to seek professional advice when assessing the understanding of Youngblood Industries business models, systems, metrics and projected returns and values as presented in this Agreement, other Terms, the Website, the White Paper or elsewhere.

12.17. You acknowledge and agree that in no event shall Youngblood Industries or YGB and all affiliates be liable or responsible for any loss in any way arising out of your participation in the IHO, receiving and holding YGB, or use of the Website and Youngblood Industries is hereby released by you from liability for any and all such loss.
