

CARPENTIER BOOT COMPANY

2023/24
HIGH-PERFORMANCE PRODUCT GUIDE

MADE IN THE NETHERLANDS

YOUR WINNING EDGE AT A GLANCE

CBC's innovative products are designed to meet the demands of the ever-evolving, highly technical world of ice speedskating.

From our flagship disruptive boot technology line to our native accessories, all products are designed by U.S. Olympic Hall of Fame member Kip Carpenter, coined "The World's Best Equipment Man" in the sport.

CBC supports skaters of all ages and ability levels. We invite you to learn about the CBC difference via our product guide below.

NEW PRODUCT SPOTLIGHT

MEET YOUR FIRST SHORT TRACK BOOT

ONYX

Calling All Parents!

Are you a short track parent looking for a beginner boot that...

- WON'T have your kid in tears due to discomfort?
- WON'T break the bank?
- WILL help your kid progress faster in the sport?

Then we have just the boot for you! Introducing the CBC Short Track ONYX, which answers the call for an affordable, entry-level CBC short track boot designed specifically for the following markets:

- Growing kids
- Beginners and/or recreational skaters wearing a size 42 boot or smaller

Note: The ONYX boot is less stiff than our Element and Genesis boots and does not provide the same level of support as our higher impact Element and Genesis models.

If you are a competitive skater training 3 or more days a week, please see our ELEMENT and GENESIS models. If you wear a boot size of 43 or larger, please see our ELEMENT and GENESIS models.

WHY THE ONYX

World's Best Fitting Last

What sets the ONYX apart from equivalent boots in competing brands? Its sleek, eye-catching appearance, for one. But more importantly, like the ELEMENT and GENESIS, the ONYX is hand-built on "CBC's World's Best Fitting Last." What does that mean? CBC's proprietary lasts (the form used to build the boot on) were created based on data gathered from over 10 years worth of custom speed skate scans. In addition to providing the best average fit, our lasts account for some of the most commonly seen issues in speed skaters' feet. As such, CBC's boots hands-down (no pun intended) provide the best average fit available on the market today.

Comfort Fit

CBC has two *World's Best Fitting Last* types: standard and "wide." Generally speaking, our high performance boots are narrower than competing brands by design. Why? Because narrower boots allow for more space in the lean in the corners; i.e. less chance of contact with the ice. We offer a "wide" version of our boot to accommodate those who require the extra space and/or for those looking for more of a comfort fit in their high performance boot. **ALL ONYX BOOTS ARE BUILT ON THE WIDE LAST AND THEREFORE OFFER A COMFORT FIT.**

Industry Leaders

While, for your convenience, we're happy to be able to offer several additional high quality native CBC products as part of our collection, Carpenter Boot Company is a boot company first and foremost. As industry leaders in this market segment, it is what we do best. We couldn't be more excited to bring you the ONYX, which provides the aesthetics and fit you desire from a CBC boot at a lower price point.

Reserve Yours Today

The ONYX will be stocked and available for purchase via our website and all authorized CBC dealers in August/September of 2023. We are now accepting preorders - reserve yours today!
