2008-2010 f250-f350 grille insert install guide

Cutting is required

Tool needed
11mm wrenches
1/4 wrench
Plastic cutting tool
Drill with bits

Remove the grille shell from the truck.

Cut grille shell (See image to the right top)

Center grille insert will sit on the surface of the grille.

Mark holes where tabs are present.

Drill holes with 3/8 drill bit.

(see image to the right bottom)

locate the 4 hold down tabs attach them to the corners. (See image at the bottom)

locate the side grilles and place them in there openings on the grille shell.

Side grilles will sit flush to the surface of the grille.
Locate the 4 tabs mark and drill 1/16 hole.

Reverse the steps to install grille back on to the truck
