

TECH SPECS

*These specifications are designed to ensure that your
INSIDE MONTESSORI screening is of
the highest quality.*

VIDEO SPECIFICATIONS

Your copy of INSIDE MONTESSORI will play best if it is projected to a screen that is 16x9 1.77, which is the aspect ratio of the film.

DIGITAL SPECIFICATIONS

The film can be accessed online at insidemontessori.vhx.tv for streaming or download.

DVD SPECIFICATIONS

If you plan to screen the film in English, please select "Play." Please note that there should be English subtitles during the foreign language sections in the film.

If you plan to screen the film using one of our subtitle options, you can choose the language needed in the "Setup" menu. Once you select the language you need, select "Main Menu." Then, select "Play" to play INSIDE MONTESSORI with the subtitled language.

AUDIO SPECIFICATIONS

You have the option of using 2.0 stereo or 5.1 (Dolby Digital) surround-sound audio. You can choose which audio playback you prefer in the "Setup" menu. Venues set up for 5.1 DD audio will deliver the best playback; your event staff will be able to let you know if this is the case. In the absence of 5.1 DD audio, we suggest that you run audio through a sound mixer for higher quality sound.
