

STEPS:

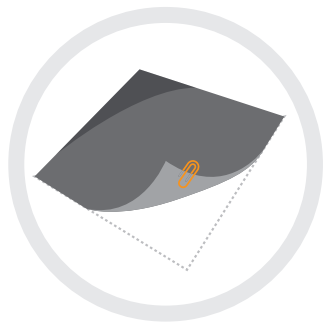

Prep your device

The surface of your device needs to be clean, so grab your damp towel and wipe your device down to remove any funk.

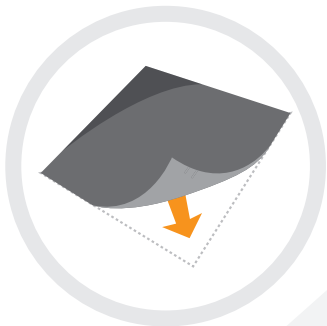

Dry your device

Using your dry towel, make sure there's no water left on your device.

Get the skin ready

Using your safety pin or paperclip, carefully remove any tiny cutouts of the skin (like the microphone and speaker cutouts on iPhones).

Peel & Apply

Now you can gently peel your skin off its backing...
