

BIOTECH RESEARCH®

*Skin*DEAGE™

- Instantly visibly reduces bags under eyes, wrinkles, sagging skin and dark circles under eyes†
- Also provides therapeutic benefits for long term skin deaging†

READ CAREFULLY

Proper Application:

Serum residue suggests that excess product has been applied. Excess residue may be **removed** using a damp cloth. Avoid rubbing the serum as it may break the connection with the skin. If this happens, wipe and clean the serum off and start over.

You can use a moisturizer with the serum, but it must be an Oil-Free moisturizer. You should apply the moisturizer first, then allow approximately 15 minutes **BEFORE** applying the serum as the last and final step.

Priming the bottle before the first use:

1. Remove bottle cap
2. Place the bottle on a flat surface. Firmly press down on the pump with your thumb.
3. Continuously press down on the pump until the serum starts to flow.
4. After the desired amount of serum is dispensed, replace the cap.

How to apply:

1. Thoroughly wash and dry the application area before applying the serum. Perspiration and skin oil may lessen the effects of the serum. You may use additional

- applications of the serum if needed.
2. Prime the bottle before you use the serum the first time. After that, press down on the pump until it expels a small amount of serum.
 3. Avoid contact with eyes. Carefully dab a thin layer of serum on the desired area. (Everyone's skin is different. Try a small amount of serum at first, then apply a larger amount the next time if you need to.) Use it on: Crow's feet, smile lines, facial and forehead wrinkles, dark circles and puffy bags under your eyes.

4. Allow the serum to set and dry. Avoid talking and making facial expressions until the serum is dry (approximately 4 minutes).

SkinDEAGE Noticeable Results:

You may feel a tightening sensation on your skin as the serum dries. This feeling is normal.

Wrinkle reducing effects are not permanent. Effects may last up to 8 hours if applied properly and individual results vary.

Applying the serum on clean skin is key, as perspiration and skin oil may diminish the effects.
