

# METHAMPHETAMINE TEST

## INSTRUCTIONS FOR USE

FOLD LINE

FOLD LINE

FOLD LINE

FOLD LINE

- 1) Fold bottom portion of pouch in half.
- 2) Squeeze folded portion until frangible seal breaks.  
\*\*User should hear a "pop" sound when internal seal breaks.
- 3) Thoroughly work the liquid from the upper small chamber down into the bottom chamber containing the towelette.
- 4) Open pouch using tear notch and remove the activated towelette.
- 5) Wipe a suspected substance or surface for the presence of metamphetamine and related substances.
- 6) Wait 30 seconds to observe a color change.
- 7) A positive test will produce areas of Dark or Cobalt Blue color.
- 8) Dispose of test materials according to established department policies.

**Always wear proper PPE (personal protective equipment) when handling unknown and potentially hazardous substances.**
